WITNESS	PAGE
<u>MS. MAUREEN EDWARDS</u>	
EXAMINED BY MS. TANG	6
QUESTIONED BY THE PANEL	43

1 THE INQUIRY RESUMED ON MONDAY, 5TH JUNE 2023, AS
2 FOLLOWS:

3
4 MS. TANG: Good morning Chair, Panel. The Inquiry will
5 hear evidence from Ms. Maureen Edwards this morning on 09:59
6 behalf of the Belfast Trust, and that evidence will be
7 regarding Module 2 which will be topics A and F, Trust
8 Budget and Finance Including Capital Spend Post
9 Bamford. She'll be speaking to June Champion's
10 statement, which the reference for which is 0881, and 09:59
11 she'll be dealing with some of the issues that
12 Ms. Champion wasn't able to provide details about
13 whenever she gave evidence.

14 CHAIRPERSON: Yes. And indeed Ms. Champion actually
15 referenced this witness, of course, in relation to 09:59
16 finance, when she was giving evidence.

17 MS. TANG: Yes. Yes, she did indeed.

18 CHAIRPERSON: That's very helpful.

19 MS. TANG: If there are no further issues, I could call
20 the witness? 10:00

21 CHAIRPERSON: Yes, certainly. Can I mention -
22 obviously there was legal argument last Thursday. As I
23 indicated I will give my determination today, but I
24 think it's fairer to get on with the witness and then
25 I'll deliver it. We'll take a short break and then 10:00
26 I'll deliver my determination. Yes, let's get the
27 witness in.

28 MS. TANG: Yes. Thank you, Chair. Maureen Edwards,
29 please.

1
2 MS. MAUREEN EDWARDS, HAVING BEEN SWORN, WAS EXAMINED BY
3 MS. TANG AS FOLLOWS:
4

5 CHAIRPERSON: Can I just thank you - I'm sorry we 10:00
6 haven't met, but can I just thank you very much for
7 coming along to assist The Inquiry. We understand the
8 circumstances in which you're here. You didn't of
9 course make your own statement, but I think you did
10 contribute to the statement of June Champion, and it's 10:01
11 really to assist us specifically in relation to that
12 module which Ms. Champion couldn't assist us with. So
13 thank you for coming along.

14 1 Q. MS. TANG: Good morning, Ms Edwards. I'm Shirley Tang.
15 You and I met a short time ago. I'm one of the counsel 10:01
16 team to the Inquiry. As you know I'm going to be
17 asking you a series of questions that will be related
18 to The Trust budget and finance, including some of the
19 capital spend programmes post Bamford. You've agreed
20 to speak to that topic which was previously dealt with 10:01
21 in the statement of June Champion. You have a copy of
22 that in front of you, can I confirm?

23 A. Yes.

24 2 Q. I'm going to be specifically looking at paragraphs 13
25 to 53, which are on pages 6 to 16, and then I'm going 10:01
26 to be looking at paragraphs 91 to 194, and that's on
27 pages 24 to 52 of the statement. Does that include -
28 is that part of the paperwork that you have?

29 A. Yes.

1 3 Q. Good. Can I check that you've had an opportunity to
2 read through all of those paragraphs?
3 A. Yes.

4 4 Q. I'm not going to ask you to formally adopt the
5 statement into evidence, because Ms. Champion has 10:02
6 already done that, but if you could confirm that you're
7 content to speak to the evidence that is contained
8 within those paragraphs, that would be helpful?
9 A. Yes, I am content.

10 CHAIRPERSON: Can you keep your voice up. Sorry, Ms. 10:02
11 Tang.
12 MS. TANG: Sorry. I'll speak up.

13 5 Q. I want to find out a little bit first about your
14 current role and your background. So what is your
15 current role with the Trust? 10:02
16 A. I am currently the Director of Finance, Estates and
17 Capital Development in the Trust, a position I've held
18 since June 2017.

19 6 Q. And what did you do before that?
20 A. Prior to that I was Co-Director of Finance in the 10:02
21 Belfast Trust, and I held that role since the inception
22 of The Trust in 2007.

23 7 Q. So you've worked for Belfast Trust since 2007?
24 A. Yes.

25 8 Q. Did you work for the previous legacy organisations in 10:03
26 Belfast?
27 A. I worked - my immediate role before Belfast Trust was
28 for a short period Director of Finance of the Royal
29 Hospitals after a longer period as Deputy Director of

1 Finance in the Royal Hospitals.

2 9 Q. Okay. Thank you. That's helpful. Okay. Can I refer
3 you then to paragraph 22 of the statement. It deals
4 with the Trust's budget. And perhaps if that could be
5 pulled up on the screen, please? I'll give you the
6 page reference. It's on page 8. Thank you. See in
7 the paragraph:

10:03

8
9 "The Belfast Trust receives the previous year's
10 recurrent budget baseline uplifted for pay and price
11 inflation and amended to reflect any new investments,
12 savings or service changes."

10:03

13
14 Can you clarify first of all what's meant by
15 "baseline"?

10:04

16 A. Well, the Belfast Trust has a budget of around £1.9 to
17 £2 billion, and most of that budget - it receives most
18 of its income from the Department of Health through the
19 SPPG, the Strategic Planning Performance Group. That
20 budget every year is rolled forward from the previous
21 year, so most of the budget is just rolled forward year
22 on year, but obviously each year there are new needs.
23 For example, if a pay award is granted, or to account
24 for non-pay inflation, or if there are agreed service
25 developments, so if there's a new service or a service
26 expansion. So whilst we have most of our budget is the
27 year before budget rolled forward, it will be adjusted
28 then for any new costs or pressures that are funded, or
29 in previous years we've had money retracted for

10:04

10:04

1 savings.

2 10 Q. I was coming on to ask about savings actually. Can I
3 check first of all before we leave, the things that are
4 added into the budget. Is The Trust typically fully
5 funded for pay awards and price inflation? 10:05

6 A. It is fully -- it has been until this year fully funded
7 for -- because we haven't had a pay award for '23/'24
8 -- but up to this year, yes, we have had full funding
9 for all pay awards, and also for -- we usually get an
10 agreed non-rate for non-pay inflation, which will be 10:05
11 based roughly on the CPI, for example, but it can vary
12 between years, between 1%, 2, 3%, but we would get
13 specific increases, for example, for the minimum wage,
14 and that would be built into the non-pay inflationary
15 uplift so that we can pay our independent sector 10:06
16 providers, who will have increases in their costs due
17 to, for example, the minimum wage.

18 11 Q. Would it be fair to say that cost pressures is an
19 assumption as to what those are going to be? So if an
20 independent sector provider, for instance, came along 10:06
21 to you and said "Actually our costs have gone up quite
22 a bit", The Trust, in that scenario, might not have
23 been given sufficient funding to meet new costs?

24 A. No, you're right. Likewise with the Trust, we have
25 cost pressures and they are not always funded, and we 10:06
26 would then have to enter into discussions with SPPG to
27 explain what the pressure is, and then they would
28 validate or otherwise the pressure, and funding would
29 follow. So, with others who provide service to the

1 Trust, the same process would follow. If there is a
2 pressure that they feel is outside a normal pay or
3 price uplift for which they will have already been
4 funded, then they would have to discuss that with the
5 Trust.

10:07

6 12 Q. would there be scenarios when SPPG, or indeed
7 yourselves, would have to go back to whoever is asked
8 for increased funding and say "I'm sorry, we don't have
9 it. We accept that there may be an issue, but we can't
10 fund it." Does that happen?

10:07

11 A. Yes, it can happen, and usually our starting position
12 will be we can pass on to you the funding that we've
13 received for pay and price inflation. But, as I said,
14 if there is a legitimate concern, so for example,
15 during Covid, additional money was provided to us, and
16 then we pass that on to independent sector or other
17 service suppliers to the Belfast Trust.

10:07

18 13 Q. Kind of related to that I want to ask you about savings
19 now and the arrangements that there have been for
20 those. You mentioned that, I think if I am correct,
21 that this year you haven't had a savings target applied
22 but previously you would have?

10:07

23 A. In 2021, 2021/'22, the financial period that ended on
24 the 31st of March, we did not have a general savings
25 target applied. We are expecting a savings target for
26 '23/'24, the current financial year. But, yes, you're
27 right, we had savings targets every year until
28 2020/'21.

10:08

29 14 Q. And when you say "every year" is that right back to the

1 dawn of the Trust?

2 A. Since inception.

3 15 Q. So 2007, when you were in there?

4 A. Yes.

5 16 Q. How do those savings targets typically work? 10:08

6 A. There was -- the Department of Health agreed the

7 savings targets to be applied to each Trust, and then

8 SPPG - previously the Board HSCB - would have retracted

9 money equivalent to that percentage savings target.

10 17 Q. A percentage target? 10:08

11 A. It was usually a percentage target, yes.

12 18 Q. And was it targeted at individual areas, perhaps

13 certain programs of care, or was it just Belfast Trust

14 X%?

15 A. No, it was a blanket general savings target, and then 10:09

16 The Trust decided how best to make those. So back at

17 the inception of The Trust, the savings targets were

18 based on RPA savings. So when the six legacy trusts

19 joined, there was an expectation, for example, that

20 there would be -- part of the savings was identified 10:09

21 specifically as a management cost savings, and then

22 other more general savings targets were applied.

23 19 Q. So would there have been a situation where you had a

24 roll forward budget, there would have been an element

25 of uplift for new costs, or whatever those be, but that 10:09

26 might have been cancelled out by the fact that a

27 savings amount had been withheld from the Trust. So

28 you were effectively trying to do the same with less

29 every year?

1 A. It would certainly. It depended on the rate of pay
2 inflation and non-pay inflation, and the amount The
3 Trust received for agreed inescapable cost pressures or
4 new investments relative to the amount that was applied
5 as a savings targets. I would have to go back and 10:10
6 check, but I imagine every year -- well, I would be
7 fairly certain that every year we had a net increase in
8 income. But, yes, there would have been amount
9 off-setting any new income in relation to savings.

10 20 Q. Yes. You used the word "inescapables" there. Can you 10:10
11 explain what inescapables are?

12 A. Well, inescapables are cost pressures that we believe
13 we could not control those cost pressures happening.
14 So, for example, if you had a demand related pressure,
15 or a re-settlement, for example, in Muckamore, where 10:10
16 The Trust had no option but to incur that cost, we
17 would deem that to be an inescapable cost pressure.

18 21 Q. So in terms of practical examples, just to help us
19 understand. In a mental health or learning disability
20 setting, an inescapable - you've mentioned 10:11
21 re-settlement - is that the typical kind of inescapable
22 cost for that programme of care, or what other types of
23 inescapable costs might you have in that setting?

24 A. Yes. In learning disability, yes, re-settlements would
25 be probably the most significant inescapable pressure 10:11
26 every year, or other demand pressure. So we have more
27 children over recent years transitioning into learning
28 disability, so that, that increase in the demand every
29 year we would deem as an inescapable cost pressure.

1 22 Q. For an area like Muckamore would savings targets have
2 been applied to it throughout the period of time that
3 we've spoken about, from 2007 onwards?

4 A. Learning disability, the directorate itself would have
5 had a target and would have been expected, for example, 10:12
6 in the earlier years, to make the management savings
7 associated with bringing multiple services into one, so
8 that would have reduced the management intake. But, if
9 any other savings targets, each Directorate was asked
10 to try to come up with ways in which they could meet 10:12
11 the savings target of The Trust, but that had to be
12 through safe service reductions where there had been,
13 for example, improved productivity or efficiency. And
14 obviously in the case of Muckamore, whilst it wasn't
15 against those savings targets, we know, for example, 10:12
16 there would have been an expectation in the hospital
17 that there would have been reduced costs in wards
18 provision, for example, and an increase in cost of
19 community as people were resettled out of Muckamore
20 into the community. 10:13

21 23 Q. So, just thinking about the hospital facility itself,
22 if I'm understanding you correctly there would have
23 been a level of savings target that ward managers or
24 service managers covering that area would have been
25 expected to deliver on. Is that correct? 10:13

26 A. Yes, they were certainly given targets. In reality
27 those savings targets, the general savings targets were
28 not achieved and, therefore, The Trust has a savings
29 target gap that it has been building up over recent

1 years, because we were not able to safely make savings
2 in some areas, and that would have included Muckamore
3 Abbey.

4 24 Q. So are you saying Muckamore didn't make its savings
5 targets? 10:13

6 A. No. No, it did make...

7 DR. MAXWELL: Can I just ask? would that have been
8 presented as a cost improvement plan by the
9 Directorate?

10 A. If they had identified savings plans, yes, that would 10:14
11 have been presented as a cost improvement plan.

12 DR. MAXWELL: And so would those documents be available
13 from 2007 onwards, if the Inquiry wanted to see them?

14 A. Yes, if there had been any -- I'm not sure the extent
15 to which there were cost improvement plans, but my 10:14
16 understanding is that Muckamore Abbey would not have
17 achieved much in the way of savings.

18 DR. MAXWELL: So the Directorate would have had a cost
19 improvement plan that they were submitting to you.

20 A. Yes. If they are -- yes, if they had cost improvement 10:14
21 plans that have been approved and savings made, yes,
22 they would be available.

23 DR. MAXWELL: Thank you.

24 25 Q. MS. TANG: Can I ask you just in general, what kind of
25 things might a service area, a mental health area, for 10:14
26 instance, typically be expected to do to try and make
27 savings?

28 A. Well I suppose it is much easier probably to explain in
29 an acute ward, for example, but a mental health acute

1 ward would be similar. If, for example, it was deemed
2 that the length of stay for patients in one of our
3 hospital wards, when compared with peer hospitals in
4 the NHS, for example, if it appeared that our length of
5 stay was longer, then the Directorate would look at 10:15
6 ways, they would look to explain why that might be the
7 case. And, for example, it would look at ways at which
8 they could improve the length of stay. So, for
9 example, not bringing patients in ahead of need, having
10 pre-assessment, for example, instead of bringing 10:15
11 patients in before they needed to be in the hospital.
12 Getting patients back home more quickly. Sometimes if
13 patients then are delayed in hospital that would add to
14 the length of stay, and that would obviously add to the
15 cost and the number of beds needed. So if a 10:15
16 Directorate identified that there was potential, there
17 was opportunity to reduce the length of stay, then they
18 would put that plan in place and then identify the
19 savings that could be released from that.

20 26 Q. would clinical areas be expected to carry a certain 10:16
21 amount of staff vacancies perhaps to try and achieve
22 savings? So maybe gapping how long it takes to fill a
23 post?

24 A. Yes, and Directorates have made savings, usually
25 fortuitously, where, for example, we know that a 10:16
26 vacancy won't be filled for a number of months, even
27 though you've tried to plan ahead, then there probably
28 -- you know, in some cases, particularly in
29 administration, for example, where a post wouldn't be

1 filled and you wouldn't necessarily bring in agency for
2 maybe a number of weeks or months, then you will have,
3 I suppose, fortuitous savings. But you wouldn't plan
4 in a ward to not safely staff a ward. So if you have a
5 vacancy, then ward managers would try as best they can, 10:17
6 before a vacancy is filled substantively, to cover that
7 vacancy with, for example, additional hours of
8 part-time staff, or bank staff or, if necessary,
9 agency.

10 27 Q. I could appreciate that would be a somewhat clearer 10:17
11 decision to make in an acute setting where there might
12 be safe levels of staffing already set, and rotas of
13 how many people, or, you know, ratios of how many
14 people you would need. An area like Muckamore where
15 there may not have been a clear, a clear understanding 10:17
16 of exactly how many staff were needed to have safe
17 staffing levels, can you say would there have been a
18 pressure at any point in time to try and allow a
19 certain amount of vacancies to run to try and make sure
20 they made some of their savings? 10:17

21 A. That would not have been The Trust's intention, and
22 certainly that wouldn't have been a message The Trust
23 would have shared with the Directorates. In any
24 discussions in savings, the first principle was that
25 services should be safe and patient safety and quality 10:18
26 was the first priority. So it would not have been the
27 expectation that people would not have -- would have
28 avoided safely staffing areas to generate savings.

29 28 Q. Did we know, to your knowledge, how many staff it would

1 have required to safely staff Muckamore?

2 A. I'm probably not the best person to answer that, but I
3 know in mental health wards, and certainly in acute
4 wards, there are safe staffing levels, and wards and
5 Departments are funded to those staffing levels. 10:18
6 DR. MAXWELL: But there would be an agreed
7 establishment?

8 A. Yes, and that's why, whilst I'm not the best person to
9 ask, I know that Muckamore, like every Department,
10 would have had an agreed staffing level and funded 10:19
11 accordingly, and my expectation would be that that was
12 based on clinical decisions on how many people were
13 needed on each shift. So the ward budget is made up of
14 - it starts with how many people are needed in the
15 morning, afternoon and evening shift, how many staff 10:19
16 does that require on a 24-hour basis across the full
17 week? How much do you add then for holidays, annual
18 leave, et cetera? And that comes up with this is the
19 number of staff that you need to fund that ward and
20 Department. 10:19
21 DR. MAXWELL: And who signs off the establishment? Is
22 there a professional input? For example, would the
23 Director of Nursing sign that off?

24 A. My understanding would be that the Directorate and the
25 ward manager, and right up to the Director of Nursing, 10:19
26 would sign off, or would certainly have oversight of
27 the safe staffing levels.

28 29 Q. MS. TANG: Can I ask you then, looking down on to
29 paragraph 26, which I think is just over the page. A

1 little section there reads:

2

3 "In recent years there has been an increasing gap
4 between the level of recurrent funding provided and the
5 financial needs of the Belfast Trust." 10:20

6

7 Can you tell me what the main drivers have been that
8 have led to that mismatch between recurrent funding and
9 the financial needs of The Trust?

10 A. Yes. Well in recent years I suppose there has been an 10:20
11 acknowledgment that pressure on public sector funding,
12 and including health, as that has increased then it has
13 been more difficult to begin the year with what we
14 believe is needed for the year, and some of that is
15 because we are, as a Trust, carrying unfunded, 10:21
16 inescapable pressures which have been funded maybe on a
17 one-off basis in recent years, but have not got a
18 recurrent funding associated with them yet, and as I
19 said earlier, we have had some unmet savings targets
20 which have become an underlying deficit for The Trust, 10:21
21 and we haven't had the recurrent funding to match that
22 in recent years.

23 30 Q. So is there a case that health needs have increased
24 along with all of that or are health needs fairly
25 static? 10:21

26 A. Health and social care needs rise every year. It
27 varies across year because I suppose, depending on the
28 various elements insight. So in a year when there is a
29 significant pay award then the total cost of health and

1 social care will rise more. But it is considered
2 generally that health and social care needs between 3
3 and 6% increase every year to keep up with growing
4 demand. Demographic growth, as you know, would be a
5 significant pressure in recent years because of the 10:22
6 aging population, and that will apply as well in
7 learning disability where, as I said earlier, we have
8 more children transitioning into adult learning
9 disability, and more demand per se. The aging
10 population, people are living longer, with more complex 10:22
11 needs, and that adds to the total requirements for The
12 Trust every year.

13 31 Q. Are there inefficiencies in the system as well that
14 you...

15 A. Well I think if -- you have a report, the recent fiscal 10:22
16 report on health, and it really focused on health
17 rather than social care, I mean there is suggestion in
18 that report that there are inefficiencies in the
19 Northern Ireland health and social care arena, and I
20 suppose I don't think hand on heart any Trust could say 10:23
21 that they were 100% efficient. Some of that is
22 systematic, there are reasons why, maybe for economies
23 of scale, for example, we can't be as efficient as
24 maybe a Trust in the NHS, and there are, you know,
25 always areas where we could do better. 10:23

26 32 Q. Can we go down to paragraph 27, following on from that
27 one? I want to read you a little bit of that, which
28 is:
29

1 "While to date the allocation of non-recurrent funding
2 to the Belfast Trust each year has been sufficient to
3 enable it to break-even, there is no budget certainty
4 in respect of non-recurrent funding."

10:24

5
6 That does sound quite a precarious situation to be in,
7 if I've understood it correctly. Is that in effect
8 that the Trust gets a financial bailout at some point
9 in the year to help it meet its financial targets, or
10 have I not understood that correctly?

10:24

- 11 A. In the last few years The Trust has had to rely on
12 considerable non-recurrent monies in year, usually
13 during the year, to help it break-even, some of that
14 Monday has come from monitoring rounds, departmental,
15 monitoring rounds, for example, and some of it will
16 come from slippage. If we had, for example, money at
17 the beginning of the year for a service development,
18 and there was a delay in putting that in place, maybe,
19 you know, lack of ability to get staff in as quickly as
20 we'd wanted, then that gives us, I suppose, some
21 non-recurrent monies in year, and that has helped us to
22 break-even. But, you're right, I mean that sentence is
23 saying, that paragraph, that our recurrent budget has
24 not been sufficient to allow us to break-even and we
25 have needed those injections of non-recurrent cash.
26 But as I've said there, there is no budget certainty,
27 because by its very nature some of that non-recurrent
28 money is one-off in nature and can't be relied upon.
29 33 Q. You've referred to cost pressures in your evidence that

10:24

10:24

10:25

1 you have given. would things like high levels of
2 agency nurse staffing be considered as a cost pressure?

3 A. Yes, it is certainly a very significant cost pressure
4 in the Trust at the minute, and that probably would
5 fall more into category of escapable pressures; were we 10:25
6 able to recruit staff and fill the vacancies? But we
7 haven't been able to in all cases, and we've had to use
8 agency nurses to allow us to provide safe levels of
9 care.

10 34 Q. And would it be fair to say that for Muckamore 10:26
11 particularly, agency nurse staffing would be a
12 significant cost?

13 A. It has been a particular pressure, yes, in Muckamore,
14 because we have had very significant rates of vacancies
15 and we have had to employ agency staff, yes. 10:26

16 35 Q. And has The Trust had to allocate additional funding
17 into the Muckamore budget to cover that, or had it been
18 expected to manage that within what it has as a
19 recurring budget?

20 A. No, we have allocated funding to match the costs in 10:26
21 Muckamore, and then The Trust has held that deficit
22 centrally, and that deficit in previous years had been
23 covered by some of that non-recurrent money that I've
24 referred to earlier. So we would have regular meetings
25 your our commissioners, SPPG, and we would raise all of 10:27
26 our pressures, including specifically the staff agency
27 costs of Muckamore, and then we would ask them to fund
28 those, and they have not been able to provide the
29 recurrent funding at this point yet to meet all of

1 those pressures and we've had to rely on non-recurrent
2 money for that.

3 36 Q. I would imagine The Trust would be keen to see the
4 agency cost budget reduce over time, from what you're
5 saying. Are you aware of anything strategic that the 10:27
6 Trust is involved in to try and address some of the
7 difficulties attracting staff to Muckamore?

8 A. Yes, I suppose, you know, before I come to Muckamore,
9 more generally The Trust we had considerable nursing
10 vacancies in the Trust, and you've probably heard maybe 10:27
11 from nursing colleagues that we have had a very
12 successful international nurse recruitment programme,
13 which has had a significant impact on vacancy levels.
14 Unfortunately we haven't really been able to use
15 international nursing for Muckamore Abbey, for learning 10:28
16 disability, although we have had some success in mental
17 health. In Muckamore, the team there, you know, are
18 continuously looking at ways to better recruit and to
19 better retain staff. So, you know, that is a regular
20 discussion at executive team and Trust Board meetings. 10:28

21 37 Q. From a financial perspective, is there any leeway that
22 they could be given to pay enhanced rates or anything
23 like that to try and relieve that problem, or is that
24 something The Trust wouldn't be able to stand over?

25 A. The Trust normally is expected to comply with AFC, 10:28
26 Agenda For Change, terms and conditions, and medical
27 terms and conditions. But in Muckamore there has been
28 additional payment made in recent years, which the
29 Department of health approved, and that was a 15%

1 recruitment and retention were premium as a one-off
2 specific mechanism to attract and better retain staff
3 in Muckamore.

4 38 Q. Did it work?
5 A. I'm not sure the extent in nursing, we still have a 10:29
6 significant vacancy level, so I'm not sure the extent
7 to which it is deemed to have worked in recruiting
8 staff, but I expect the service would be better placed
9 to explain whether they believe the premium helped
10 retain staff. 10:29

11 39 Q. Do you know when that took effect, what year, roughly?
12 A. No, I would have to check.

13 CHAIRPERSON: I think it is mentioned in the statement
14 somewhere and I can't...

15 MS. TANG: Okay. I can check back on that. 10:30

16 A. Yes, I can certainly check.

17 40 Q. Okay. Going down to paragraphs 41 -- I am going to
18 look at 41 to 43 now. And that is page 13. I want to
19 ask you about budget holders and who might typically be
20 a budget holder. would anyone on the Muckamore site 10:30
21 have been a budget holder?

22 A. Yes. I mean The Trust, as you'll see there in the
23 budget pack in tab 9 on page 1305 I think, The Trust
24 operates a devolved budgetary system, and that means we
25 try to give budget responsibility to those who can have 10:30
26 the most effect in managing the budget. So we would
27 expect, and at Directorate level, for ward managers,
28 for example, to oversee the budget for theirs. So a
29 ward sister would get her budget, or his budget report

1 every month. They would also get a list of the staff
2 in post so that they can check, for example, that
3 everybody they are paying for is supposed to be paid,
4 and that the hours they are paid are the expected hours
5 and the hours that they work, and that will form part 10:31
6 of the costs of their ward. They will have the annual
7 and then the monthly budget, and they will have details
8 of their spend and, therefore, if there is any
9 variance, then they would be expected to understand
10 that variance and do what they can in terms of action 10:31
11 planning to try and manage that spend back within
12 budget, if that's possible.

13 41 Q. You've mentioned that there was a savings target
14 applied to the Trust. Would that savings target have
15 been reflected in the budget statement that the ward 10:32
16 manager, for instance, got?

17 A. Savings targets have generally been attributed to the
18 Directorate and would be held at the Directorate at
19 sort of the co-director. In their budget report they
20 would see the line and they would only give it to, they 10:32
21 would only allocate an element of that out to a ward if
22 a ward had identified a plan by which to make those
23 savings. So in a ward, the ward sister or the ward
24 manager would not see that savings target, unless they
25 had an identified plan to make those savings. 10:32

26 42 Q. Would it be fair to say that there must have been a
27 degree of pressure within Directorates to try and come
28 up with schemes from all the different areas to make
29 savings?

1 A. Well they would have, as part of their budget
2 responsibilities, shared The Trust's responsibility to
3 achieve a break-even and, therefore, they would have
4 had responsibility to seek opportunities to make
5 savings, yes. 10:33

6 43 Q. So, as the Director of Finance, would you have expected
7 directorate managers, for instance, or co-directors, to
8 be having the conversations with the areas underneath
9 them to probe where savings could be made and to come
10 up with some ideas? 10:33

11 A. Yes, that's part of our budgetary framework. The focus
12 usually is on spend against the budget, and ways in
13 which you can get back into budget, but some of those
14 conversation would also have been "Is there anything
15 else we can do to contribute to Trust break-even?" Are 10:33
16 there opportunities, looking at benchmarking, for
17 example, looking at performance elsewhere, to do things
18 better and more efficiently?

19 44 Q. Obviously some allegations of abuse came out in
20 relation to Muckamore. Were you aware from that point 10:34
21 in time of any change in attitude towards cost
22 pressures or savings targets in relation to Muckamore?
23 Was there -- did the Trust take a different approach
24 from then on?

25 A. I'm not aware of any particular change in approach, 10:34
26 because the approach has always been that people seek
27 opportunities for savings with the underlying principle
28 that anything, any of those savings must not compromise
29 safety and quality.

1 45 Q. So was there anything by way of just saying "Right,
2 we're not going to put any pressure on Muckamore.
3 We'll just take our eye off them in terms of financial
4 targets and savings", or do you recall any kind of
5 conversations of that nature? 10:34

6 A. I suppose I don't believe there was pressure prior to
7 that for them to make savings that weren't achievable,
8 so not really.

9 46 Q. Okay. I want to talk now about re-settlement, and that
10 will take us to paragraph 46, which would be page 14. 10:35
11 I just want to read a short bit from that one.
12
13 "A finance theme relating to Muckamore that has been
14 prevalent from the Belfast Trust became operational in
15 2007 has been the increasing per capita spend. The 10:35
16 reality is that the fewer patients Muckamore has, as
17 patients are resettled, the higher the required spend
18 per capita within Muckamore. This has meant that as
19 time has gone on, and resettlements have been
20 successful, the cost per patient within Muckamore has 10:35
21 increased significantly because the costs of staffing
22 and maintaining Muckamore do not decrease
23 proportionately to each patient who is discharged."
24
25 Can you just explain why that is? 10:36

26 A. I suppose there are a number of elements there. If you
27 have a ward, and I'm not specifically talking about
28 Muckamore here, but if you had a ward of say 10
29 patients, and one patient is resettled, the staffing,

1 particularly, you know, the nurse supervision level,
2 and the nurses per patient, wouldn't necessarily reduce
3 at all with one patient, and it would take a cohort of
4 patients to go before any real change to staffing
5 levels occurred. So the fixed or semi-fixed costs of 10:36
6 that ward would remain virtually unchanged until a
7 number of patients had left, and that means the cost
8 per patient has increased. Also, I suppose, over time
9 in Muckamore the remaining patients tend to be the most
10 complex patients. So, therefore, the patients left 10:36
11 usually require more nursing per patient than when the
12 hospital was fuller.

13 47 Q. Okay. Looking at paragraph 47, just following on from
14 that. There's a reference there to funding pressures
15 in 2007 due to full costs being removed when a Western 10:37
16 Health and Social Services Board patient was resettled.
17 Was the funding around a move like that not agreed
18 upfront so that everybody would know how much money was
19 going to come out of Muckamore to follow the patient
20 back up to the west? 10:37

21 A. Well my understanding, and I wouldn't be as familiar
22 with that specific case, but in terms of Muckamore
23 re-settlement programme at that time, there was an
24 agreement between the four Boards and the Belfast Trust
25 that as patients were resettled out of Muckamore then 10:37
26 the money would be retracted out of Muckamore to help
27 fund those re-settlement packages, and the
28 understanding would be, as I said earlier, you may not
29 be able to close a ward or even reduce the staffing

1 levels until a cohort of patients left the ward, but
2 there was obviously, at that time in the programme, an
3 expectation that, for example, as a certain cohort of
4 patients were resettled then a ward could be closed and
5 the money would then be retracted. I expect from this 10:38
6 that the Western Trust was going to use that for
7 another purpose in their area. But what did happen, I
8 know at that time, is that, yes, there would have been
9 a plan to close a ward. What invariably happened,
10 there were delays in resettling the patients. We 10:38
11 weren't able to close the wards as quickly as possible,
12 so the plan slipped, and I know from my experience that
13 the Board, then we made bids to the Board for what we
14 called bridging funding. So we said, yes, the money
15 had to come out for that ward to fund the re-settlement 10:39
16 programme, unfortunately there has been a delay so we
17 bridging for, whether it was three months or six
18 months, until the ward was able to be safely closed,
19 and they gave that back as non-recurrent money until
20 such times as we were able to close the ward. 10:39
21 DR. MAXWELL: Can I clarify the funding in 2007,
22 because as I understand it Muckamore Hospital is a
23 tertiary service funded by HSCB, but this seems to
24 suggest that the other Trusts are purchasing services
25 from the Belfast Trust. What is the funding source? 10:39
26 A. Well at a point at times, certainly in the Legacy
27 Trusts, all of the Boards would have funded their
28 patients, and then in the Belfast Trust, you're right,
29 the Health and Social Care Board would have given us

1 the funding. But we would have still potentially had
2 patients until the west and the Southern Trust had
3 their own hospitals, we would have had patients on a
4 regional basis.

5 DR. MAXWELL: So you still have patients from the 10:40
6 Northern Trust, for example, because they don't have an
7 in-patient facility. Are they paying a marginal rate
8 for their patients on top of the money you're getting
9 from HSCB, now SPPG?

10 A. No, we hold all of the funding for the patients in 10:40
11 Muckamore and the other Trusts don't pay us.

12 DR. MAXWELL: So when did that change? when did it
13 change from the other Trusts paying a marginal
14 rate...(INTERJECTION)?

15 A. I believe that happened then when we became the Belfast 10:40
16 Trust. I expect this - and I will certainly go back
17 and clarify - I expect this maybe was when the Legacy
18 Boards became one Board, and there was a need in a
19 Trust in the western area, that they were tidying up
20 the funding before we all became Trusts. But I can 10:41
21 certainly follow that up.

22 DR. MAXWELL: Okay. Thank you.

23 48 Q. MS. TANG: That's brought me on to a question more
24 generally on re-settlement, which is: whenever The
25 Trust had re-settlement targets set, and they agreed 10:41
26 that a certain number of people would hopefully move
27 over a period of time, how did the funding of that get
28 built into that plan?

29 A. Well we would have agreed those re-settlement plans

1 with the Board, and any retraction as the ward closes
2 would have been part of that overall agreement. So we
3 would have - at the beginning of the year we would have
4 discussions with the Board, with the HSCB at the time,
5 about how many patients were going to be planned to be 10:41
6 resettled that year, their expected dates of
7 re-settlement, and the estimated costs, and then
8 throughout the year we would, on probably a monthly
9 basis, would have revisited that with the Board, and if
10 we didn't require all the money, because, for example, 10:42
11 there had been a delay in the patient re-settlement,
12 then the Board would just give us what we needed.
13 Likewise, if the costs changed for legitimate reasons
14 that are approved by, or were approved by the Board,
15 then they would have increased the money that we needed 10:42
16 accordingly. Most years I think there was a slip
17 against the very initial. I suppose we try at the
18 beginning of the year to make sure we have enough money
19 set aside, but invariably there was a bit of slippage
20 and we didn't require the whole lot. And, likewise, we 10:42
21 didn't retract from wards as quickly as possible.

22 49 Q. What kind of things would make a re-settlement end up
23 delayed or not work out?

24 A. A number of reasons. If the provider of the
25 resettlement package was delayed, for example, either 10:43
26 in getting the building ready for re-settlement or
27 having adequate staffing, that would be delayed. Also,
28 if the patient, the resident in Muckamore wasn't ready,
29 so patient readiness, so whilst the clinical teams will

1 have agreed plans, you know, they will keep a very
2 close eye on that, and if the patient, if the patient
3 isn't ready, sometimes the patient would have - I can't
4 think of the word - a tryout re-settlement, and if that
5 doesn't work, you know, then the patient, that might 10:43
6 delay the start date of the re-settlement.

7 50 Q. Can you ever recall a time when arguments over funding
8 or issues getting funding or releasing funding would
9 have contributed to a delay?

10 A. No, we would have -- we would have made sure that that 10:44
11 did not delay the re-settlement of a patient. Those
12 ongoing discussions with the Board around the costs of
13 a re-settlement would have been done a long time in
14 advance, and we certainly wouldn't have held back a
15 re-settlement whilst we, you know, negotiated around 10:44
16 the margins for a package.

17 51 Q. Associated with re-settlement, paragraph 49 further
18 down - sorry, just over the page, noted there that
19 there were large capital spends in 2007/2008,
20 2008/2009, and 2009/2010, of approximately £6 million. 10:44
21 Whenever we know that the 1995 Review of Policy and
22 Services for people with learning disability, and also
23 Equal Lives 2007, had been recommending that
24 re-settlement was the way to go, can you tell us why
25 those large capital spends happened or what they were? 10:45

26 A. And I don't know the exact details of what those
27 investments were at the time, but -- and I can
28 certainly find out the detail -- but the re-settlement
29 programme was over a number of years and it is very

1 important for The Trust to maintain buildings to a
2 standard that are safe. So I fully expected those were
3 inescapable capital spend decisions made to make sure
4 that whilst patients were still in Muckamore that they
5 were in a safe environment. 10:45

6 52 Q. Is that something you could give us some further detail
7 about?

8 A. I can certainly get you detail on that.

9 53 Q. Thank you. Can we move down to paragraphs 51 and 52?
10 Thank you. I'm just going to read a short bit from 10:46
11 that as well:

12
13 "The costs of resettlement, however, are in many cases
14 much more expensive. The Belfast Trust has regarded
15 re-settlement as a significant priority. Consequently 10:46
16 it has taken steps to ensure funds are available to
17 allow re-settlement to take place. The SPPG has
18 assisted through accepting re-settlement costs as
19 inescapable pressures and providing non-recurrent
20 funding to meet those pressures. This is not 10:46
21 withstanding that dealing with matters in this way
22 creates a significant accounting risk for Belfast
23 Trust."

24
25 Can you clarify why re-settlement - obviously you've 10:46
26 said it is a significant priority - why does that need
27 to be bolstered up by non-recurrent funding?

28 A. The Trust hasn't been able to secure recurrent funding
29 for the re-settlement, or enough money at the start of

1 the year, and by its nature I suppose re-settlements
2 are -- sometimes they're not part of the recurrent
3 baseline, and as they arise then we try to get
4 recurrent funding for them. So there's a bit of a
5 timing delay. But really it's we haven't had
6 sufficient funds to have a recurrent break-even plan at
7 the beginning of the year, and resettlements are one of
8 those pressures that haven't been recurrently funded.

10:47

9 54 Q. Is that something that is discussed with SPPG, or in
10 the former days Health and Social Care Board? Did they
11 accept that these are significant costs pressures or
12 what was their response?

10:47

13 A. Yes, they have accepted they were inescapable pressures
14 but did not provide recurrent funding, were not able in
15 those years to provide recurrent funding, and we would
16 discuss that, it would be in our monthly reports, and
17 we would discuss it regularly with SPPG. So they are
18 very aware of all of the pressures associated with
19 Muckamore Abbey. And as I said, where they have been
20 able to secure non-recurrent money, they have provided
21 non-recurrent money to address those pressures.

10:47

10:48

22 55 Q. And where they haven't been able to secure
23 non-recurrent money, have there been times whenever the
24 Trust just simply hasn't had enough money?

25 A. Well, we have broken even every year, so we have had,
26 through non-recurrent money or from other non-recurrent
27 measures in the Trust, for example, slippage, to be
28 able to break-even in our totality.

10:48

29 56 Q. Is it your evidence that money has never delayed a

1 re-settlement, so is this an issue then?

2 A. As we've said there, it creates a significant
3 accounting risk. The Trust would not normally invest
4 ahead of funding being secured. So, if, for example,
5 we wanted to implement a new service, we would not do 10:49
6 that without recurrent funding confirmation from the
7 Board, but we see resettlements as an inescapable
8 pressure and, therefore, we have initiated those at
9 financial risk and ahead of funding, but continue that
10 dialogue with SPPG in order to recurrently fund them on 10:49
11 a long-term basis.

12 57 Q. That's helpful. Thank you. Can I go down now to one
13 of the exhibits in relation to Muckamore? It is at
14 page 088902, please. And just at the top of that page,
15 if you can see that okay: 10:49
16

17 "As the children on the Muckamore Abbey site are
18 expected to move into the community towards the end of
19 '08/'09, The Trust's first call in 2008/'09 in respect
20 of re-settlement will be for the three people whose 10:50
21 resettlement plans have been developing this year.
22 They were identified as possible reserves for the
23 '07/'08 targets. We believe that each of them will
24 have a re-settlement cost of at least £120,000."
25 10:50

26 Can I ask, do you know what that figure covers, and is
27 the fact that they will not be taking up a bed in
28 Muckamore considered?

29 A. I'm sorry what do you mean by that?

1 58 Q. Do you know what that £120,000 would relate to for the
2 re-settlement costs?

3 A. No. No, I would have -- I'm not familiar with that,
4 but I expect that is the cost of those children, the
5 re-settlement packages for those children that we would 10:50
6 pay for their care.

7 59 Q. And would there be an offset in that, that the fact
8 that they're leaving Muckamore, they're not taking a
9 bed there, would that be released in to fund some of
10 that? 10:51

11 A. Only if there were changes in staffing, for example, as
12 a result of those children leaving. So if, for
13 example, the staffing in a ward was able to be reduced,
14 then the Board would have taken that money and helped
15 to fund those re-settlement. I'm not sure in that case 10:51
16 whether that was the case or whether indeed that money
17 released funded other patients in Muckamore, or whether
18 they couldn't be saved because you didn't get that
19 economies of scale. But I can take that away. I'm not
20 familiar with that paragraph. 10:51

21 60 Q. Yes. Yes, if you would. Thank you.

22 CHAIRPERSON: Just so that I understand. When you talk
23 about a re-settlement cost, or as you do in the next --
24 sorry, not "you" -- as the document does in the next
25 paragraph, requiring re-settlement packages. Is that 10:51
26 talking about an annual cost?

27 A. Yes, that's an annual cost that we would pay to the
28 provider of the re-settlement, the community package
29 that the resident from Muckamore moves to.

1 CHAIRPERSON: Thank you.

2 61 Q. MS. TANG: I have a question relating to statement page
3 number 934. If that could be called up, please? Thank
4 you. It's from the element of this page which deals
5 with the capital investment plan in 2008 and '09. You 10:52
6 can see there, that there's Muckamore design fees. Can
7 you tell me what might those design fees have related
8 to?

9 A. Not at this stage. I suspect that was for the
10 treatment and assessment unit in Muckamore, but I will 10:52
11 take that away. That's usually the architect's fees.
12 CHAIRPERSON: So that would be the capital costs,
13 obviously.

14 A. Yes.

15 CHAIRPERSON: Yes. Okay. 10:53

16 62 Q. MS. TANG: And if we could go down to 935, please, to
17 the table that's within section 3.2.3. You can see
18 there that there is a further approved capital scheme
19 for Muckamore of "Muckamore Phase IV Capital Project
20 Spend" of just short of 5 million. Can you tell us 10:53
21 what that was?

22 A. Likewise that would be, I imagine, the capital spend
23 following the design phase. It's probably the same
24 scheme, but I'll find out about both of those.

25 63 Q. Thank you. Back to the main body of the statement then 10:53
26 to page 30 and paragraph 117. I want to look at the
27 topics of risk and governance now. We had some
28 conversation with Ms. Champion on that and she was able
29 to give us detail on the management and clinical risk

1 systems. I wanted to talk to you about the financial
2 governance and links between that and the governance
3 systems that Ms. Champion was able to tell us about.
4 Paragraph 117 refers to the development of integrated
5 governance and then goes on to give some detail about 10:54
6 how that has rolled out across the NHS elsewhere. Can
7 you tell me what you understand by that term
8 "integrated governance"?

9 A. This wouldn't be my area of expertise, but integrated
10 governance brings together clinical, corporate and 10:54
11 financial governance. So all of those governance
12 structures required to ensure that the Trust provides,
13 you know, safe quality care within the resources that
14 it has.

15 64 Q. So in practical terms, as an Executive Board, how does 10:54
16 that work as an integrated governance approach?

17 A. Well we have our governance framework, we have
18 Assurance Committee that would deal with clinical
19 governance and other elements of corporate governance,
20 we have our audit committee, that would be around the 10:55
21 financial governance, and all of those various
22 committees report through into Trust Board. We would
23 have a Principal Risk Register, and then at service
24 level we would have service specific risk registers,
25 for example, that would cover all the various strands 10:55
26 of governance and risk.

27 65 Q. So, if I'm correct, if I'm understanding you correctly,
28 there are tiers of risk registers going right up
29 through the organisation. You mentioned the Principal

1 Risk Register. Is that the same as the Corporate Risk
2 Register or is that something different?

3 A. It is -- again, others would be able to probably
4 articulate this better...(INTERJECTION).

5 CHAIRPERSON: I was going to say, are we getting off 10:55
6 your area?

7 A. Yes.

8 MS. TANG: Is this not your thing?

9 A. No. No, it wouldn't be my area of expertise.

10 66 Q. Okay. I understand. In that case can I go down to 10:56
11 paragraph 183, which I think may be closer to your
12 remit. That's where there is reference to the
13 Corporate Risk Register. Sorry, I'll give you a page
14 number for that. That is page 49 please. It's
15 paragraph 183. That's picking up on the Principal Risk 10:56
16 Register. There was reference elsewhere to the
17 Corporate Risk Register. Is that a document that the
18 finance function would use or is that something that...

19 A. No, it's not. It's not purely finance. That's a
20 number of corporate risks would be in there, including 10:57
21 finance would just be one of our corporate risks, the
22 financial position, the ability to make break-even, for
23 example, would be just one of the corporate risks.

24 67 Q. So what kinds of operational issues would be tracked
25 using a Corporate Risk Register? 10:57

26 A. I mean various. In my own patch, for example, we would
27 have fire safety, water safety, ventilation, in my
28 estates world. But each Directorate or service
29 division would have their own risks at their service

1 level that would feed into that. And, again, I'm not
2 probably the best person to answer that.

3 68 Q. Okay. So if I'm understanding you correctly, it's a
4 great big overview of all risks within the
5 organisation, some financial, some service area or 10:57
6 whatever it be...(INTERJECTION)?

7 A. Yes. Estates, clinical, yes.

8 69 Q. Okay. Is that a prioritised document? Does The Trust
9 Board, for instance, look at it and go "well here's the
10 ones we really need to worry about. Here's the ones 10:58
11 that are less likely." How does that happen?

12 A. Yes, it is prioritised, so that what's held at
13 Directorate Risk Register that we're managing, we're
14 managing a risk, then that wouldn't be on the Principal
15 Risk Register because it is being managed and mitigated 10:58
16 as well as possible. The Principal Risk Register
17 highlights the risks that, I suppose, are of most
18 concern, and that they are the ones brought to
19 Assurance Committee and to Trust Board.

20 70 Q. Can I be clear, the Principal Risk Registers that 10:58
21 highlight those concerns, are those purely service area
22 ones or might there be a financial equivalent of that?

23 A. Yes, there would - finance would be also part of the --
24 we would have the ability to break-even.

25 71 Q. Okay. I understand. 10:58

26 A. And the lack of sufficient budget to predict the
27 break-even would be considered as a principal risk.

28 72 Q. Okay. So in terms of the things that are typically on
29 Principal Risk, is it like the top ten biggest risks

1 for The Trust or is it much more than that?

2 A. No, it's anything which needs to be raised at that
3 level. So that can vary from year to year, and some of
4 those risks, then once its established that there are
5 mitigations in place, so if there is a particular risk 10:59
6 that arises that can be addressed, we can get
7 mitigations in place and then that comes off the
8 Principal Risk Register. So it varies year on year.

9 73 Q. would it be fair to say though that that is the
10 priority list? Those are the things...(INTERJECTION)? 10:59

11 A. Yes. Yes, they would be the priority risks.

12 74 Q. And are those discussed at Trust Board or how are those
13 managed?

14 A. They would be discussed at Assurance Committee which
15 feeds into Trust Board, and then the Assurance 10:59
16 Committee minutes, for example, which would highlight
17 the key actions, the key priorities, would then be
18 discussed at Trust Board.

19 75 Q. So, is there someone, for instance if there was a
20 Muckamore related issue on the Principal Risk Register, 11:00
21 is there someone that is tasked with an action plan or
22 how do you ensure the risk is dealt with?

23 A. Well, that would be the director of the service, and I
24 would say Muckamore is as -- it is a standing item at
25 every Trust Board, and it's discussed at almost every 11:00
26 executive team, and it would be discussed at length
27 then in Assurance Committee. That would be with a
28 combination of Director of Muckamore's Learning
29 Disability, the Director of Social work would also have

1 a key work, key role in terms of safeguarding and
2 reporting, and then you'd have various other people for
3 elements maybe associated with Muckamore, recent
4 Muckamore issues.

5 76 Q. So you said that it was discussed -- it is a standing 11:01
6 item at every Trust Board. Is there a plan or is there
7 a...(INTERJECTION)?

8 A. Yes, there are detailed actions taking place. So, for
9 example, there will be an update on the re-settlement
10 programme, for example, and where that is. There would 11:01
11 be an update on The Inquiry. There would be an update
12 on CCTV and investigations, for example. So there
13 would be very detailed plans and updates provided.

14 77 Q. Do you recall any discussion about staffing and 11:01
15 staffing shortages?

16 A. Staffing would be one of the standing items in the
17 update of the Muckamore Report, there would be an
18 update on where we are with staffing, any impending
19 recruitment, any particular challenges and updates on
20 recruitment, for example, and numbers of nurses in 11:01
21 post.

22 DR. MAXWELL: Presumably it only became a standing item
23 after the revelations in 2017?

24 A. I've only been on The Trust Board since 2017, but it
25 has been an item. It isn't one of our standing items 11:02
26 per se on a Trust Board, but it tends to be.

27 DR. MAXWELL: It is because it is high risk?

28 A. Yes. It tends to be discussed at every meeting as an
29 update because The Trust Board like an update.

1 DR. MAXWELL: But if all of the risks have been
2 identified it wouldn't have been routinely discussed at
3 the Board?

4 A. It would have been discussed, as with all other
5 Directorates, if there were issues that needed to be 11:02
6 raised with Trust Board.

7 78 Q. MS. TANG: I have -- I want to refer you now to a
8 couple of the exhibits, the first of which is on page
9 1538. If that could be called up, please? That's the
10 Assurance Framework, Board Assurance Framework. Can 11:02
11 you explain what the main purpose of that document is,
12 please?

13 A. Again, I think you've -- some of my colleagues will be
14 here and will probably be able to articulate that
15 better, but it does provide -- the intention of it is 11:03
16 to provide Trust Board with assurance that the Trust
17 has identified and has good oversight of key risks,
18 mitigations and actions to address those risks.

19 79 Q. Can we go to page 1546, please? And I just wanted to
20 ask you - I think Audit Committee is somewhere further 11:03
21 down that page, please. There it is. Did this
22 committee deal with purely financial audit
23 considerations or would there have been other more
24 general audit arrangements?

25 A. No, Audit Committee, we have reports from our internal 11:04
26 audits who would do reviews, about a third of those are
27 finance and the rest are risk and governance, and then
28 they do also audits into various issues and services.
29 They would look at, for example, they would do a fire

1 safety audit in an area of The Trust. So, no, they're
2 not all finance.

3 80 Q. Okay. Thank you. Ms. Edwards, those are all my
4 questions, but the Panel may have some questions, so
5 I'm going to hand over to them.

11:04

6

7 MS. EDWARDS WAS THEN QUESTIONED BY THE PANEL AS
8 FOLLOWS:

9

10 CHAIRPERSON: Dr. Maxwell wants to ask you a question.
11 If it is outside your remit, then you'll just tell us
12 of course.

11:04

13 A. Okay.

14 DR. MAXWELL: So I'm wondering about the management of
15 patient finance and patient property, which I'm
16 suspecting ultimately comes under the Finance
17 Department to set the policies, and also under internal
18 audit, which I suspect also probably comes under your
19 responsibility. So I wonder if you would be able to
20 talk in general about how patient finance and patient
21 property is supposed to be managed?

11:04

11:05

22 A. Yes. Finance would set the policies around that, and
23 internal audit is obviously an independent function who
24 would do the audits on patient's property and patient's
25 finances. But the role in managing the finances comes
26 under the care managers who report through obviously on
27 the clinical side, so they wouldn't be finance staff.

11:05

28 DR. MAXWELL: So if patients had, who were in Muckamore
29 for a long period of time, had accrued substantial

1 amount of cash, would that be managed on behalf of them
2 by The Trust?

3 CHAIRPERSON: Sorry, Dr. Maxwell, I just want to
4 understand. Do you mean in terms of Social Security
5 payments or that sort of thing? 11:06

6 81 Q. DR. MAXWELL: well, anything. Yes. It could be
7 benefits. We've heard some of the families give
8 evidence that, you know, there can be thousands of
9 pounds worth of patient's money at Muckamore being
10 managed on their behalf by The Trust, and I'm just 11:06
11 wondering how that works? And presumably that would be
12 through some cash office or account?

13 A. Yes, there is a cash office, and residents of Muckamore
14 can hold their cash in there. If they -- they're
15 assessed as to whether they can operate their own 11:06
16 funds, or the family, and in some cases then I think
17 there is - I don't know the terminology - Power of
18 Attorney or whatever, and RQIA, we have to advise RQIA
19 if any resident holds over I think it's £20,000. I can
20 get information specifically on our policies and 11:07
21 procedures around that but, yes, the day-to-day, the
22 Social Security, that is managed as part of the whole
23 care manager's remit with the patient, but finance, we
24 will ensure that the policies are followed and then
25 internal audit will review and do testing to make sure 11:07
26 that everything is operated properly.

27 DR. MAXWELL: It would be helpful to learn a bit more
28 about the process.

29 A. Yes, that's no problem. I can get you

1 some...(INTERJECTION).

2 82 Q. CHAIRPERSON: And, again, this maybe very basic, but if
3 a patient has been in receipt of any form of Social
4 Security or benefit, and they then come into the
5 hospital for a long time, is there any question of The 11:08
6 Trust, or indeed the DOH, being able to retain that
7 benefit, or does it still always belong to the patient?
8 And if you don't know, then obviously...

9 A. I would have to check that. I know what happens when
10 somebody is care managed or when they go into a nursing 11:08
11 home. I'm not sure what benefits residents in
12 Muckamore are eligible for and what happens, so I will
13 get you the detail on that.

14 CHAIRPERSON: Okay. That would be helpful. Thank you.

15 11:08

16 END OF QUESTIONING BY THE PANEL

17

18 CHAIRPERSON: Thank you. Can I thank you very much
19 for coming along to help us on that very specific area
20 that you have focused on. I don't think we'll be 11:08
21 seeing you again, as far as I know. We will see.

22 DR. MAXWELL: Never say never.

23 A. And apologies some of the things -- I mean it is a very
24 broad subject, and some of my colleagues will be able
25 to provide me with the detail and I'll pass that on to 11:09
26 you.

27 CHAIRPERSON: No, we understand that entirely, but
28 thank you very much for your attendance today. Thank
29 you.

A. You're welcome.

CHAIRPERSON: what we'll do is we'll take a short break now, and rather than make everybody wait until 12.00, I'll deliver the determination at 11.30.

11:09

SHORT ADJOURNMENT
