1 THE INQUIRY RESUMED ON TUESDAY, 26TH SEPTEMBER 2023, AS  
2 FOLLOWS:

3  
4 CHAIRPERSON: Good morning. Yes, Mr. McEvoy, I gather  
5 we've got problems with our first witness this morning. 09:59

6 MR. McEVOY: It was anticipated that P8's mother would  
7 give evidence orally, but she is unavoidably  
8 unavailable this morning, so it's proposed that I read  
9 the statement in.

10 CHAIRPERSON: I gather she's unwell. And just to 09:59  
11 mention, I think the same may apply to the witness on  
12 28th, Thursday, in the afternoon, but we'll see where  
13 that goes. We are giving witnesses the opportunity to  
14 join by Zoom if they're able to do so. Okay. But in  
15 the meantime, we're going to hear you read P8's mother? 09:59

16 MR. McEVOY: That's right. And the Inquiry reference  
17 then is statement no. 147. The statement is dated 6th  
18 of September 2023.

19  
20 STATEMENT FROM P8'S MOTHER READ: 10:00

21  
22 MR. McEVOY: "I, P8's mother, make the following  
23 statement for the purpose of the Muckamore Abbey  
24 Hospital Inquiry. In exhibiting any documents, I will  
25 number my documents. So my first document will be 10:00  
26 exhibit 1."

27  
28 And, Panel, there are a number of exhibits that I  
29 propose just to draw your attention to at the

1 conclusion of the statement.

2  
3 "My connection with Muckamore is that my son P8 was a  
4 patient in Muckamore. The relevant time periods that I  
5 can speak about are from 3rd June 2011 to 6th October 10:00  
6 2017, when my son was discharged from Muckamore.

7  
8 My son P8 was born on 8th December 1990. He is now 33  
9 years old. He has three siblings" - who are named -  
10 "born on 6th April 1999, born on 18th May 2000, and 10:00  
11 then a third who was born on 6th June 2001 and  
12 unfortunately died on the same day.

13  
14 P8 was my first born and he was delivered in the Mater  
15 Hospital in Belfast. I had a normal pregnancy, but P8 10:01  
16 had a forceps delivery. P8 was a good wee boy. He  
17 slept and fed well. When P8 was born, I moved in with  
18 my mum and dad for support. My mum and dad helped me a  
19 lot when P8 was baby, as did my sister."

20  
21 P8 father's is named. 10:01

22  
23 "However, he was parented by me and my former husband"  
24 - who is also named - "who I married in August 1994.

25  
26 P8 was a bubbly and active child. P8 had a passion for 10:01  
27 any type of music. He loved car keys and playing with  
28 cushions. He loved his food. He was a happy child and  
29 was pleasant to be around. I took him to mother and

1 baby group activities at various places where we lived.  
2 P8 attended nursery" - in a town which is named - "for  
3 one year in September 1995.  
4 I recall when P8 was five years old, in and around June  
5 1998, we lived in" - and she names the location - "my 10:02  
6 sister and I were going to a darts competition. It was  
7 a Tuesday evening. My sister was driving and she  
8 pulled the car over and told me that she had something  
9 that she needed to say to me. I thought she was going  
10 to tell me that she was ill or something like that, but 10:02  
11 she told me that our neighbour" - who is named - "told  
12 her that two boys had been playing in the field beside  
13 our house and the two boys had touched P8's penis. The  
14 two boys were aged nine and ten and P8 was five years  
15 old at the time. I was told that the matter had been 10:02  
16 reported to Social Services and that a social worker  
17 was coming out to my house to tell me about this  
18 incident and investigate the following Thursday. The  
19 two boys had been sexually abused by their daddy and  
20 had a history of touching other young boys. 10:03  
21  
22 On the Wednesday prior to the meeting with the social  
23 worker on the Thursday, it was arranged to meet me at  
24 my sister's house. I was told that her two boys told  
25 her that they had touched P8 down below on his private 10:03  
26 bits. I did not want to hear what she was telling me,  
27 but I told her that I did not blame her for what her  
28 boys had done. I could not believe that this had  
29 happened to my son.

1

22  
23  
24  
25  
26  
27  
28  
29

On the following day, two social workers came out to my house. I recall that one of them was named... of Social Services. I do not recall the name of the other social worker. The social workers advised me that P8 had touched two boys, which was not what that other person had told me the previous day. 10:03

I recall taking P8 to Social Services offices during the summer of 1996 so that he could be interviewed about the incident. There was a chalk table in front of him in the room. A girl was interviewing him about the incident. I do not recall her name. P8 just kept drawing red circles on the chalk table around and around with the chalk. 10:04

Due to the age of P8 and the circumstances that there were conflicting views of what occurred, nothing further was done in respect of the incident. 10:04

After this incident, P8 drastically changed. It was like a light switch. He became withdrawn. He soiled his clothes with urine and bowel movements frequently. He just wanted to sit watching television all of the time. He became jumpy and nasty. His attitude changed and he became very clingy to me and would not let me out of his sight. In turn, I was afraid to let P8 out of my sight after what had happened to him. 10:04

1 P8 went to primary one in September 1996. This is a  
2 mainstream school."

3  
4 His teacher is then named, his primary one teacher is  
5 then named.

10:04

6  
7 "I recall she had just completed a course in children's  
8 special needs. She advised all of the parents on the  
9 first day that she would be arranging meetings with  
10 each of them after the Halloween break. She had  
11 arranged a meeting with me. However, within two weeks  
12 of P8 starting in the school, the teacher advised me  
13 that P8 was hiding under the table and trying to lock  
14 himself into broom cupboards. The teacher reminded me  
15 that P8 should be assessed by the Education Board as  
16 potentially having special educational needs.

10:05

10:05

17  
18 The assessment did not take place until P8 went into  
19 primary two."

20  
21 The teacher, the primary two teacher is then named. A  
22 lady is then named from the Education Board, who came  
23 out to assess P8 at his school.

10:05

24  
25 "I do not recall her surname or her job description. I  
26 recall that she was assessing six other children at the  
27 same time. After the assessment, the school principal  
28 and this lady invited me to a meeting at the school and  
29 advised me that they thought that P8 had attention

10:05

1           deficit hyperactivity disorder. The person from the  
2           education authority was recommending that P8 take a  
3           table" - which presumably should read "tablet" - "which  
4           she described which would be like a sedative and he  
5           should take half of a tablet at bedtime and half of a     10:06  
6           tablet in the morning. I do not recall the name of the  
7           medication she was referring to. I was unhappy about  
8           this and refused, as P8 was only six years old.  
9           Eventually, this lady called P8 diagnosed with P8  
10          having severe behavioural needs. I am sure that I     10:06  
11          received something in writing confirming this, but I do  
12          not have a copy of it. I do not recall exactly when  
13          this was.

14  
15          I continually contacted P8's general practitioners     10:06  
16          about him soiling himself."

17  
18          The doctor is then named.

19  
20          "He arranged an appointment with a doctor at another     10:06  
21          health centre" - which is named - "He specialised in  
22          behaviour and incontinence. This was in and around  
23          1996. He advised me that he believed that P8 had an  
24          overactive or lazy bowel. The doctor believed it was  
25          also a behavioural problem.     10:07

26  
27          P8 regularly came home from school covered in urine and  
28          excrement. I had to keep sending in changes of clothes  
29          for him. He would urinate or make a bowel movement and

1 then just sit in his clothes. I kept trying to retrain  
2 him to use the toilet.

3  
4 P8 refused to communicate with me or his teachers. He  
5 would pull his jumper up over his head or go under the 10:07  
6 table when we tried to talk to him.

7  
8 P8 did not progress to primary three at that mainstream  
9 primary school. He could not cope with the school. He  
10 went to another school. This was educational behaviour 10:07  
11 unit. I recall that he was collected in a taxi at  
12 7 a.m./7:15 a.m. and did not return home until 4:30  
13 p.m. or 4:45 p.m. each school day. He was exhausted  
14 and in bed before 6:30 p.m. He was there for around  
15 six months. 10:07

16  
17 I recall he was allowed to return to school for one day  
18 to make his First Holy Communion with the other  
19 children. P8 got on okay at school, but there was no  
20 change in his behaviour. 10:08

21  
22 When P8 was seven or eight years old, he went to a  
23 behavioural unit at a primary school" - in a town which  
24 is named - "He attended there for one year, but I  
25 recall he was asked to leave, as he had hit out at a 10:08  
26 teacher. I do not recall the teacher's name or any  
27 other details of him being asked to leave the school.  
28 Thereafter, P8 was home schooled, as I was advised by  
29 the employee from the education authority that there

1 was nowhere else for him to go. Someone from the  
2 education authority came out to our house a few hours  
3 per day, three days per week to teach him. I cannot  
4 recall the name of the teacher.

5  
6 Thereafter, he attended a special school" - in a place  
7 which is named - "This was a brilliant school. He  
8 attended there until he was 19 years old. The staff  
9 there knew how to handle P8's behaviour. When he was  
10 ten or eleven years old he also attended another place 10:08  
11 for respite. He attended that place once per month  
12 from Wednesday to Friday and the staff left him off and  
13 collected him from school whilst on respite.

14  
15 P8 was put on to Children's Disability Social Services 10:09  
16 at the Trust by his general practitioner."

17  
18 And the social worker is also named.

19  
20 "The doctor and the social worker were married to each 10:09  
21 other. P8 really clicked with the social worker and  
22 they had a good relationship. P8 did not like males,  
23 but he had no issue with females. A social worker  
24 attended our house for visits to see how P8 was getting  
25 on and also linked in with P8's school. 10:09  
26

27 When P8 was around 13 years old, there was an incident  
28 in my friend's house. P8 was playing with her  
29 daughter" - who is named - "who hit P8 on the back with

1 a stick. There was a bruise on P8's back and when P8  
2 went into school, one of the teachers in the school  
3 noticed the bruise. P8 told the school that I had hit  
4 him and there was an investigation. I recall going to  
5 the general practitioners and the doctor advised me 10:10  
6 that P8 would not be allowed to come home with me that  
7 evening. I recall my sister had to take P8 overnight  
8 while they investigated the incident which led to the  
9 bruise. P8 was allowed to come home with me again the  
10 next day. 10:10

11  
12 P8's behaviour and needs were monitored by his general  
13 practitioner and social worker. I recall being advised  
14 by a doctor and social worker that P8 should be  
15 admitted to a behavioural unit for assessment. " 10:10

16  
17 And the place, the location of the place is named.

18  
19 "I agreed to this, as they told me that P8 would still  
20 attend school. He did attend school for a little while 10:10  
21 after admission, but they stopped taking him to school,  
22 as I was advised that P8 had stopped communicating. I  
23 recall that he was in that location for a few months.

24  
25 I recall that it was P8's birthday and I had asked the 10:10  
26 hospital if I could take him out for the day. There  
27 was a miscommunication between the hospital and I and  
28 when I returned to the hospital with P8 after our day  
29 out, the hospital would not let me leave him back in

1 again. The they discharged him and he came home with  
2 me. P8 returned to the school again. I cannot  
3 remember any other details about this or staff  
4 involved. "

10:11

5  
6 I don't propose, Panel, to read the next paragraph,  
7 because it deals with an unrelated set of allegations  
8 and I don't think it adds anything to the Inquiry's  
9 work for me to read them out. But I will pick it up at  
10 paragraph 19:

10:11

11  
12 "When P8 finished school at 19 years old, which was in  
13 June 2010, he had no interest in anything. Local  
14 activities were organised by Gateway, but P8 did not  
15 want to participate. He stayed at home with me and my  
16 husband. "

10:11

17  
18 And the next paragraph, the beginning of the next  
19 paragraph to the bottom of page 7 deals with the  
20 circumstances of an index incident and I don't propose  
21 to read it out, Chair, but I can summarise it. Suffice  
22 to say, it leads to an investigation. And then if I  
23 bring it up at the bottom, the very bottom of the page,  
24 the third line from the bottom:

10:12

25  
26 "We instructed a firm of solicitors" - who are named -  
27 "The social worker from the Adult Disability Team at a  
28 hospital" - who is named - "was P8's social worker at  
29 the time. He advised me that I should put P8 into

10:12

1 Muckamore for an assessment as a voluntary patient, as  
2 he suggested that this may assist him in respect of the  
3 ongoing court case. He advised me that P8 would only  
4 be in Muckamore for six to eight weeks. He advised  
5 that if I did not put him in voluntarily then the court 10:12  
6 would put him in.

7  
8 P8 went into Muckamore on 3rd June 2011 and was  
9 admitted to Six Mile Assessment. H52 was the nurse in  
10 charge who dealt with the admission. I recall P8 was 10:13  
11 very upset and he was crying. I phoned three or four  
12 times per day in the first few weeks, but P8 refused to  
13 talk to me. He also refused to see me.

14  
15 P8 was in Muckamore and the court case was still 10:13  
16 running. When the six to eight weeks was completed, I  
17 had a meeting with H50, the consultant, and H92, the  
18 ward social worker at Muckamore. They advised me that  
19 they did not understand why I was under the impression  
20 that P8 would be in Muckamore for only six to eight 10:13  
21 weeks.

22  
23 After this meeting, matters went down hill quite  
24 rapidly. I kept asking for information regarding P8  
25 and his treatment, but I never received any 10:13  
26 satisfactory answers. I spoke to whoever nurses were  
27 on at the time. H13 was the ward manager and H14 was  
28 the forensic nurse. I asked or applied to the ward  
29 multidisciplinary team on several occasions for P8 to

1 be given home leave, only to be responded to with  
2 excuses as to why P8 was not permitted home. I would  
3 be advised, usually by either H13 or H14, that P8 was  
4 not complying with requests from staff.

5  
6 From the date that P8 entered Muckamore, I was given  
7 limited information about him and his treatment. I  
8 have a power of attorney for P8 and I am his next of  
9 kin. I was never properly informed of anything to do  
10 with P8 by any staff at Muckamore. I never got to see 10:14  
11 where P8 slept or ate. It was P8 that kept me informed  
12 during our conversations and visits. The staff told me  
13 very little. For example, in the first year P8 was in  
14 Muckamore, he had a few health issues that I was not  
15 informed about until P8 told me weeks afterwards. P8 10:14  
16 told me that he had bloods taken and that his bloods  
17 were too high. I do not know what this meant. P8 told  
18 me that there was something wrong with his liver. I  
19 recall P8 asked me if he was going to die, but I could  
20 not answer him, because I knew nothing about this. He 10:15  
21 told me he had been to the dentist and had a filling  
22 two weeks after he had had the appointment. I found  
23 out that P8 had been to the opticians only when he came  
24 out to me during one of my visits wearing a pair of  
25 glasses. P8 told me that he had a toenail removed by 10:15  
26 the paedriatrist. I do not recall the specific dates of  
27 any of these events, but they were during his first  
28 year in Muckamore.

1 I issued a letter of complaint to Mr. Patrick Convery,  
2 Mental Health and Learning Disability Team at RQIA by  
3 letter dated 16th August 2012 listing these and other  
4 complaints. I attach a copy of the letter at  
5 Exhibit 1. These may appear as small things, but they 10:15  
6 were of great importance to me as P8's mother, as, up  
7 until he went into Muckamore, I had accompanied my son  
8 to all of his health appointments since he was born. I  
9 felt that Muckamore was withholding important  
10 information about my son's health from me. 10:15

11  
12 On 9th March 2012 the Crown Court in Northern Ireland  
13 made a Sexual Offences Prevention Order stating that P8  
14 was under a disability." 10:16

15  
16 I don't propose to go into the details of the order,  
17 which is exhibited to the statement.

18  
19 "On the same day, 9th March 2012, H50 applied for, and  
20 was granted, a hospital order to detain my son for 10:16  
21 further treatment. I was not provided with any notice  
22 of the application or the reasons why he was to be  
23 detained, or indeed the treatment H50 said my son  
24 needed. I do not have a copy of the hospital order.

25  
26 When P8 was in Muckamore, I kept pushing for him to be  
27 allowed home visits. It was requested by H92, social  
28 worker, through Family Social Services that I was to  
29 have an assessment done at home. This assessment was 10:16

1 called Prevention to Protect. This was successfully  
2 completed by me, the results of which were supposed to  
3 be sent to Muckamore on 13th March 2012. I tried on  
4 numerous occasions to find out if these results were  
5 sent or received, but this was to no avail and 10:17  
6 Muckamore insisted that they had not received them. I  
7 spoke with H258, H50 and H14 all separately about it.  
8

9 On 6th July 2012 I was told these results were in fact  
10 sent and received by Muckamore on 6th June 2012. For 10:17  
11 four weeks, Muckamore had these results but still had  
12 continued to tell me that they had not received them.  
13 I felt that Muckamore was trying to hinder me from  
14 getting my son released by putting barriers up to stop  
15 me getting day release for my son, due to saying that 10:17  
16 the results had not been received. H92 and H14 had  
17 told me on occasion that my son could not have day  
18 release due to serious adult protection concerns.  
19

20 On 12th April 2012 I made a verbal formal complaint to 10:17  
21 H13, the ward manager of Six Mile Assessment about  
22 three staff members harassing my son, being H506, H367  
23 and H381. My son had advised me that H506 regularly  
24 said to him things like 'filth like you should not be  
25 given any luxuries.' P8 told me that he was reading 10:18  
26 the paper one day and H506 said to him that he was  
27 staring at photographs of children, which P8 advised me  
28 was not true. P8 advised me that H506 snapped the  
29 paper from him and he was punished by not being allowed

1 to go to the Cosy Corner shop. P8 advised me that H381  
2 always complained about P8 for nothing. I requested  
3 that those three staff members would be kept away from  
4 my son. However, this did not happen. It did not feel  
5 that my complaint was taken seriously by H13, as I did 10:18  
6 not receive any feedback from him.

7  
8 On 19th June 2012 an allegation was made against my son  
9 by one of the other patients on Six Mile Assessment.  
10 That patient worked with P8 in the gardens of 10:19  
11 Muckamore. Initially, I did not receive details of  
12 what the allegation was.

13  
14 On 22nd June 2012 P8 was put on Level 3 supervision or  
15 observation due to the allegation. H92 and H50 allowed 10:19  
16 my son to phone me to tell me that he had been put on  
17 to Level 3. He rang me in a very distressed state. I  
18 was very annoyed about this, as I felt I should have  
19 been contacted by a staff member to advise me of this  
20 instead of my distressed son. P8 was due to be given 10:19  
21 day release from Muckamore on 23rd June 2012, which was  
22 cancelled due to this allegation. And he was also due  
23 to be attending horse riding, which was also cancelled.  
24 P8 was also prevented from completing two group  
25 sessions of his treatment with the Good Progress group. 10:20  
26 I was annoyed about this, because the sessions were  
27 taking place in Muckamore and a member of staff could  
28 have accompanied him to the sessions, as he was on  
29 Level 3 supervision or observation, which I understand

1 means that P8 had to be in eyesight of a member of  
2 staff.

3  
4 I recall me and my family attended Muckamore on 23rd  
5 June 2012 as P8's day released been cancelled and when 10:20  
6 I arrived at Muckamore for the visit I was advised by  
7 H14 that I had to spend our visit in one of the  
8 visitors rooms with a member of staff sitting in with  
9 us. We were not permitted to take P8 to the Cosy  
10 Corner, which was the on-site cafe at Muckamore. We 10:20  
11 were herded like cattle into a small visitors room and  
12 treated like criminals. We were not allowed to open  
13 the window, the blinds or the door. We were advised by  
14 H505, one of the Assistant Staff Nurses who attended P8  
15 at our visit, that this was necessary as we were not 10:20  
16 allowed to make eye to eye contact with the person who  
17 had made the allegation against P8 or his family. I  
18 still did not know what the allegation was at this  
19 time. The room was very stuffy and there were about  
20 nine people in it. The room was very hot. We could 10:21  
21 not have a private conversation with P8, as H505 was  
22 present at all times.

23  
24 During this visit, H505 did not leave the room without  
25 P8 accompanying them, which is not what Muckamore's 10:21  
26 policies and procedures state as a Level 3. Level 3  
27 means that a staff member needs to be one to one  
28 eyesight. Level 4 is within arm's length. I was  
29 unhappy that Level 4 observation was being subjected on

1 P8 during our visit when this was not the level of  
2 supervision that P8 was imposed.

3  
4 I recall that having staff sitting in on our visit made  
5 us, as a family, feel uncomfortable and an invasion of 10:21  
6 our privacy. It also made P8 very upset. I asked to  
7 speak to H77 to complain, but was told by H505 that he  
8 was not available. I had spoken to H517, a Staff  
9 Nurse, on the morning of 23rd June 2012 before  
10 attending for the visit and at no time did he advise me 10:22  
11 that these restrictions would be imposed on our visit.  
12 The distress caused to P8 as a result of being put on  
13 Level 3 observation concerned me gravely.

14  
15 I complained to H507 on 25th June 2012 by telephone 10:22  
16 about the visit. I do not know H507's job title, but  
17 she was a very senior person in Muckamore. She was  
18 very abrupt with me on the telephone. She disagreed  
19 with what I was saying and what had occurred during the  
20 visit that I was complaining about. I felt that our 10:22  
21 discussion was unnecessarily very heated and she was  
22 unprofessional with me. She was very tense with me on  
23 the telephone. She did not have a satisfactory  
24 response for me. I followed this up with a letter to  
25 H77 on 10th July 2012. I received a response from 10:23  
26 H508, Complaints Administrative Officer at the Belfast  
27 Trust, by letter dated 11th July 2012 advising me that  
28 my complaints be investigated. I attach copies of  
29 these letters at Exhibits 3 and 4 respectively.

During the course of the first year that P8 was in Muckamore, he advised me that another patient pushed him onto the ground outside in the garden. He told me that staff members tried to make out that he had fallen over a plant pot. My son is not stupid and knows what really happened to him. His injuries were a badly cut and scored knee, cut and scored hand and a cut and scored elbow. I cannot recall any further details around this.

10:23  
  
  
  
  
  
  
  
  
  
  
10:23

P8 advised me on another occasion - I cannot recall when this was - that a different patient was going to attack him over a sandwich. P8 advised me that he had ordered a sandwich for his lunch and when the sandwich arrived, the other patient told P8 that the sandwich belonged to him. When P8 advised him that the sandwich belonged to him, P8 and the other patient quarrelled. P8 advised me that this patient had intimidated him on several occasions and P8 was afraid of him.

10:24  
  
  
  
  
  
  
  
  
  
  
10:24

In my letter to Mr. Convery of RQIA on 16th August 2012, I also raised a number of additional serious concerns. "

10:24

which are described. And I think what I'll do is I'll take it up at the start of the next page. But they concern various matters not involving the staff and patient abuse, needless to say. But the witness then

1 says at the top of page 13:

2  
3 "I did not feel that this was a safe environment for my  
4 son to be in. I was seriously concerned that my son  
5 needed out of the ward before someone hurt him or 10:25  
6 something bad happened to him.

7  
8 I recall on 8th July 2012 I telephoned P8 in the  
9 evening and he was very distressed. He advised me that  
10 H14 had called him into the ward office for a 'wee 10:25  
11 chat'. H14 told my son that he was called in because  
12 he was messing about with a staff member's pass on 6th  
13 July 2012. P8 advised me that H14 proceeded to state  
14 that my son was in Muckamore for a very serious crime  
15 and went on to state that the crime was rape. My son 10:25  
16 was not in Muckamore for this reason. P8 also advised  
17 me that H14 brought up the subject of my complaint  
18 about staff harassing him which I had made to H13.  
19 P8 advised me that H14 told P8 'your mum can't help you  
20 while you're in here.' 10:25

21  
22 I begged in my letter to request that Mr. Convery  
23 should conduct a thorough investigation into the issues  
24 that I raised. I also urged Mr. Convery to assist me  
25 in having my son released home to me. 10:26

26  
27 I was so distraught at this time that I wrote to  
28 Dr. Michael Maguire, the Police Ombudsman for Northern  
29 Ireland, Margaret Ritchie, MP for South Down, at the

1 House of Commons, Edwin Poots MLA, Minister for Health,  
2 Social Services and Public Safety, the Secretary of  
3 State and the Minister of State for Northern Ireland.  
4 I received acknowledgments of my letters, most of which  
5 fobbed me off, advising that it was a devolved matter 10:26  
6 and I needed to deal with the Belfast Health and Social  
7 Care Trust. I do not have copies of all of the letters  
8 that I issued, but I have attached copies of the  
9 letters which I have and copies of the responses that I  
10 received at Exhibits 5 to 10 attached. 10:26

11  
12 My sister and I attended a meeting at Muckamore on 23rd  
13 January 2013. The meeting was attended by H287, the  
14 Service Manager, and H77, Assistant Service Manager. I  
15 put some direct questions to H287 and H77, mainly 10:27  
16 concerning the fact that my son remained on Level 3  
17 observation despite the fact that the police had  
18 decided not to prosecute in respect of the allegation  
19 which had been made against him by the other patient on  
20 19th June 2012. My sister prepared minutes of the 10:27  
21 meeting, where she recorded the exact responses to my  
22 questions. We asked H77 to sign the minutes at the end  
23 of the meeting, but he refused. The outcome of the  
24 meeting was that H77 advised that I needed to speak to  
25 the multidisciplinary team. I attach copies of the 10:27  
26 minutes of the meeting prepared by my sister at  
27 Exhibit 11.

28  
29 I sent a letter of complaint to the Belfast Trust on

1 16th August 2012 complaining of the same issues  
2 contained in my letters at paragraph 30 of my  
3 statement. I do not have a copy of the letter, however  
4 I did receive a response from H287 by letter dated 31st  
5 January 2013. The letter advised me that I needed to 10:28  
6 speak to H50. I attach a copy of the letter dated 31st  
7 January 2013 at Exhibit 12.

8  
9 On 26th November 2012 I wrote a letter to H50 asking  
10 for day release for P8 over the Christmas and New Year 10:28  
11 period. I do not have a copy of this letter. I was  
12 advised by telephone that this was refused. I cannot  
13 recall who advised me of this, but it was a staff  
14 member at Muckamore. I asked for this to be followed  
15 up with a written response, which it was, by letter 10:28  
16 from H50 on 27th February 2013. I was advised that my  
17 request was refused due to a continued concern of the  
18 multidisciplinary team regarding P8's behaviour. I was  
19 very annoyed not to have P8 at home, even for a brief  
20 time, over this Christmas period. I attached a copy of 10:29  
21 the letter from H50 dated 27th February 2013 at  
22 Exhibit 13.

23  
24 I had absolutely no confidence or trust in the majority  
25 of staff on Six Mile Assessment or Six Mile Treatment, 10:29  
26 including the multidisciplinary team. The staff in  
27 Muckamore kept putting P8's release back, but I was not  
28 getting answers as to why this was happening. I  
29 strongly believe that my son was being wrongly treated

1 by staff and the multidisciplinary team at Muckamore.

2 I felt that if something happened to my son in

3 Muckamore that it was rarely, if ever recorded, but

4 anything that he was accused of was recorded

5 straightaway. I think he was victimised in Muckamore. 10:29

6  
7 Life on the ward was very stressful for P8 and I did

8 fear that there was no prospect of him getting proper

9 treatment or ever being released. My son's life was in

10 the hands of professionals. I thought Muckamore could 10:30

11 treat my child and return him to some form of

12 normality, but instead he was treated like a prisoner.

13  
14 I believe that certain staff, namely H506, H367 and

15 H381 were picking on my son to get him to react so that 10:30

16 his release could be delayed. H50, who was the

17 consultant in charge of my son's treatment, had never

18 been upfront or open with me and certainly did not keep

19 me informed. I would go so far as to say that he was

20 very deceitful. H50 constantly refused to take my 10:30

21 calls and he hid behind medical jargon and would not

22 explain anything to me as regards what was going on

23 with P8's treatment in Muckamore. He was like a

24 politician. I asked him one question and he answered

25 with the information that he wanted me to receive, not 10:31

26 an answer to my question. In my view, H50 done

27 absolutely nothing to help my son. All that he did was

28 put hurdle after hurdle up to prevent my son getting

29 home, where he belonged and I knew he would be safe.

28  
29

Not all staff were bad, however. H518, one of the nurses in Muckamore, was very good with P8. H67 and H516 were also good with him.

10:31

I tried desperately hard to get my son out of Muckamore as soon as I possibly could. During the Mental Health Review Tribunals where P8's continued detention was reviewed, I engaged lawyers and barristers to appear to push to have him released. He was refused release at a hearing on 12th April 2013. H50 issued a written report dated 31st March 2015 which made a recommendation that P8's detention be released with restrictions. I attach a copy of the report at Exhibit 16.

10:31

10:32

None of the staff in Muckamore advised me of the advocacy service available to patients and families offered by Bryson House. I only became aware of this by speaking with another patient's mother in the Cosy Corner at some stage during 2016. I reached out to Bryson House for an advocate to assist and support me with the various tribunal hearings and generally with my dealings with Muckamore. I was assigned an advocate" - who is named - "but I never knew his surname. He helped me get documents released from Muckamore to assist me and my legal team to deal with the Tribunal hearings. I believe he helped me eventually to get P8 home.

At a Tribunal hearing on 12th August 2015, following an adjournment of a hearing on 15th April 2015, the Tribunal stated that P8 could be released, with restrictions which needed to be accommodated by the Belfast Trust in advance. I attach copies of correspondence received from the Mental Health Review Tribunal, Northern Ireland Courts and Tribunal Service confirming the outcome of these various hearings at Exhibits 14, 15, 17 and 18.

10:33  
  
  
  
  
  
  
  
  
  
  
  
  
10:33

I was eventually given a release date for P8, to be on 6th June 2017. However, he was not released on this day. P8 was due to be released into supported living, but P8 wanted to come home and live with me. Muckamore were putting pressure on me to find suitable accommodation for P8 to live, given the terms of the court order dated 9th March 2012, which were, and still remains, in place. Eventually, P8 was released home to live with me on 6th October 2017.

10:33  
  
  
  
  
  
  
  
  
  
  
  
  
10:33

Since P8 was discharged from Muckamore, he flourished. He mows the lawns and cleans the cars of our neighbours. He is learning to drive. He is very good at home and looks after me. He has put Muckamore behind him and he continues to spend time with H518, a former nurse from Muckamore, and her husband. P8 loves animals and listening to music. P8's time in Muckamore were the worst six years of my life. P8 continues to

10:34

1 be subject to a court order, where he could be recalled  
2 to Muckamore at any time. There is no end date on the  
3 court order. He has to report to the police and Social  
4 Services once per year. I have recently been making  
5 inquiries with the Police Service of Northern Ireland 10:34  
6 to see whether the court order can be lifted or  
7 amended, given that it has been in place now for over  
8 11 years."

9  
10 That is the end of the substance of the statement. The 10:34  
11 Panel will obviously have read the entirety of the  
12 statement and the exhibits. It's the view of your  
13 counsel team that you may want to consider the exhibit  
14 at number 10, which is on page 41, which is the  
15 response from the RQIA to the complaint letter that 10:35  
16 P8's mother described and which is at Exhibit 1.

17 CHAIRPERSON: Sorry, page 41?

18 MR. McEVOY: This is page 41. So this is a letter  
19 dated 20th August 2012, Chair. And it's a letter,  
20 essentially, of acknowledgment. And you can see that 10:35  
21 it's from the then Director of Mental Health, Learning  
22 Disability and Social Work, who at that time was  
23 Theresa Nixon. She has CC'd in the then Chief  
24 Executive of the South Eastern Trust. We don't have,  
25 in the exhibits, the outcome or the followup, the 10:35  
26 consequence in other words, of that and it's something  
27 that the Panel may wish to follow up in due course.

28 CHAIRPERSON: This refers back to the letter which is  
29 at our page 35?

1 MR. McEVOY: That's right. So this is the letter of  
2 acknowledgment to the complaint letter.

3 CHAIRPERSON: Yes.

4 MR. McEVOY: The original letter to the RQIA, just for  
5 reference, begins on page 23. It was addressed to  
6 Mr. Convery, but this response comes from Ms. Nixon.  
7 So we don't have an outcome to that and we don't know  
8 what happened, certainly in terms of the specific  
9 issues raised by P8's mother. So it's something that  
10 the Panel may wish, in due course, to follow up.

10:36

10:36

11  
12 The other item of possible note was the written  
13 response. It may be that there isn't a great deal of  
14 significance attaching to this, but there was, in the  
15 statement, the application for Christmas leave for P8  
16 which was turned down by telephone call, the witness  
17 told us. Written reasons for that follow up at  
18 Exhibit 13 on pages 46 and 47, but they're dated 27th  
19 February and...

10:37

20 CHAIRPERSON: Yes.

10:37

21 MR. McEVOY: There's no specific -- there are five  
22 signatories to the letter, but there is no specific  
23 reason for the lapse in time.

24 CHAIRPERSON: which is three months after the letter.

25 MR. McEVOY: Yeah, and considerably after Christmas  
26 2012. That's something you may wish to examine  
27 further.

10:37

28  
29 And then there is, if I could also draw your attention

1 then to the exhibit which begins at page 58 and runs  
2 through to 63, which the Panel will recall is the  
3 report from H50 to the Mental Health Review Tribunal  
4 about P8. It is, as far as your counsel team can  
5 recall, one of very few such examples and certainly the 10:38  
6 clearest example of such a report that we've seen  
7 during the witness experience and it may be that the  
8 Panel considers that it wants to follow up questions  
9 about the methodology - maybe not at this stage,  
10 obviously, in the Inquiry's work, but perhaps later 10:38  
11 about the methodology that's followed in completing  
12 these reports, whether by H50 in particular or others,  
13 or and/or others.

14  
15 We don't have the other reports that are referred to in 10:39  
16 the first paragraph, the witness has not exhibited  
17 those, but presumably if the Panel considers it  
18 necessary, those are items that we can certainly follow  
19 up.

20 10:39  
21 And then finally, we have the decision that the witness  
22 described, which begins at page 65. And in substance  
23 then, the final decision around discharge begins at  
24 page 68 and that's the final statement of reasons where  
25 the Mental Health Review Tribunal sets out why it has 10:39  
26 found P8 fit for release, or certainly not to be  
27 detained any longer at Muckamore. And it may be --  
28 again this is the first clear cut example of such a  
29 statement of reasons that a patient experience witness

1 has produced to you and it may be that the Panel  
2 consider it necessary to get a feel or a more rounded  
3 picture of how these decisions are produced and indeed  
4 how Muckamore staff play their particular role in this  
5 process. Had the witness been able to attend this 10:40  
6 morning, that's something certainly I would've asked  
7 her to recall for us.

8  
9 So unless there's anything further, those are the  
10 issues that... 10:40

11 CHAIRPERSON: No, there was one minor thing that I  
12 picked up on. At paragraph 26 of the statement the  
13 witness refers to an incident when she attended a  
14 meeting with her son.

15 MR. McEVOY: Yes. 10:41

16 CHAIRPERSON: And she complains that they were herded  
17 into a small visitors room and there were about nine  
18 people in the room. And just out of interest, at page  
19 24 of the exhibits there's a reference to the same  
20 meeting, where she refers to seven people in the room. 10:41  
21 So that may not matter, but she may be slightly  
22 inaccurate about that.

23 MR. McEVOY: Yeah.

24 CHAIRPERSON: All right. Well, thank you very much  
25 indeed. I gather the witness has not actually been 10:41  
26 watching, but we will convey our thanks in writing to  
27 the witness of that statement.

28  
29 So far as this afternoon is concerned, I gather that

1 the witnesses can be here at 1:30. And so if everybody  
2 can be available, we'll try and start slightly early  
3 this afternoon, so if people could be available from  
4 1:30 onwards, we'll start as soon as the witnesses are  
5 ready. Okay, thank you very much indeed.

10:42

1                   THE INQUIRY RESUMED AS FOLLOWS

2  
3                   CHAIRPERSON: Thank you very much. Okay, let's get the  
4                   witnesses. Are both witnesses coming in at the same  
5                   time? 13:59

6                   MS. KILEY: They are, but one will sit with the  
7                   secretary, because the witnesses are also accompanied  
8                   by a Family Liaison Officer who will sit with each of  
9                   them whenever they are at the table.

10                  CHAIRPERSON: Right, thank you. 13:59

11                  MS. KILEY: It's Family Liaison SW2, who is known to  
12                  the Inquiry.

13                  CHAIRPERSON: Yes, I've seen him this morning. And  
14                  there are no hearing problems?

15                  MS. KILEY: No. 13:59

16                  CHAIRPERSON: Excellent.

17  
18                  P113'S MOTHER, HAVING BEEN SWORN, WAS DIRECTLY EXAMINED  
19                  BY MS. KILEY AS FOLLOWS:

20 14:00  
21                  CHAIRPERSON: Good afternoon. Can I just welcome you  
22                  to the Inquiry. We met very briefly in that room at  
23                  the back. Thank you for making a statement, thank you  
24                  for coming with your husband to come and assist us. We  
25                  know that you want to refer to your son as P113 and 14:00  
26                  that's going to be fine. And I think you've heard that  
27                  I've made an order that that name can't be used or  
28                  published outside of this room in relation to the  
29                  evidence that you give. So, feel safe, as it were,

1 using the name when you want to, all right?

2 A. Thank you.

3 CHAIRPERSON: Thank you very much. I'll hand you over  
4 to Ms. Kiley.

5 1 Q. MS. KILEY: Good afternoon. You are P113's mum and 14:01  
6 that's how you'll be known this afternoon. And we met  
7 briefly earlier on and I explained the process of  
8 giving evidence. So just to do introductions, sitting  
9 beside you is your Family Liaison Officer, isn't that  
10 right? And he is already known to the Inquiry as Family 14:01  
11 Liaison SW2, so if you hear that, that's who we're  
12 referring to. And sitting on your other side is P113's  
13 dad. And P113's dad is going to be giving his own  
14 evidence later on this afternoon, okay? But it's your  
15 turn first, P113's mum. 14:01

16  
17 You have made a statement to the Inquiry and I see you  
18 have a copy of that in front of you. So the first  
19 thing that I have to do is read portions of that out.  
20 As you know, there are portions that are subject to a 14:01  
21 Restriction Order, so I'm not going to deal with those,  
22 okay? So if I skip over those, that's why. And we will  
23 return to those in our later closed session, okay?  
24 You'll also hear me, whenever I'm reading out the  
25 statement, not use some names, but instead refer to 14:02  
26 cipher numbers. And you have a list in front of you  
27 there if you want to check who I'm referring to, okay?  
28 So if you are ready, I'll start reading. Are you ready  
29 P113's mum?

1 A. Yes.

2 2 Q. Your statement is dated the 6th of September 2023 and  
3 you say this:  
4 "I, P113's mum, make the following statement for the  
5 purpose of the Muckamore Abbey Hospital (MAH) Inquiry. 14:02  
6 In exhibiting any documents, I will number the  
7 documents, so my first document will be Exhibit 1.  
8 Family Liaison Officer SW2 attended with me when making  
9 my statement.  
10  
11 My connection with MAH is that I am a relative of a  
12 patient who is at MAH. I wish to keep the names of my  
13 family members private, so when I refer to them I will  
14 only state the nature of their relationship to my son.  
15 14:02  
16 The relevant time period that I can speak about is  
17 between 13th of April 2017 to the date of my statement.  
18  
19 My son P113 was admitted to MAH on 13th April 2017 when  
20 he was 20 years old. P113 is the middle child of three 14:03  
21 sons. He was born."  
22  
23 And you give his date of birth. And you say:  
24  
25 "In and around 1999 and 2000, I don't know the specific 14:03  
26 date, P113 was diagnosed with a severe learning  
27 disability, autism, inversion chromosome 3 and a tic  
28 disorder. P113 has limited vocabulary. He can say  
29 hello and ask how are you, but he cannot tell me when

1 he needs something or if something is wrong. If P113  
2 is in pain, he will say that he has a sore head or sore  
3 tooth, but the pain maybe somewhere else. P113 has a  
4 high pain threshold. For example, he lost the tip of  
5 his finger in a gardening accident when he was seven 14:04  
6 years old and he did not cry or respond to the pain.  
7

8 I understand P113 and know when he needs something by  
9 the way he behaves. P113 finds it difficult to adapt  
10 to change in his environment and becomes very 14:04  
11 distressed. When P113 is stressed or is asked to do  
12 something that he does not want to do, he demonstrates  
13 self-harm. He has cauliflower ear because of hitting  
14 his head with his fists. He bites his hand, throws  
15 things and sometimes strips naked. He grabs people by 14:04  
16 the hair in a firm grip and will not let go. One time  
17 he grabbed me by the hand so hard that I thought it was  
18 broken. P113 does not know his own strength.  
19

20 I will provide background information about P113's 14:04  
21 difficulties and the events that led to him being  
22 admitted to MAH on 13 April 2017.  
23

24 Following P113's diagnosis, he was accepted to school  
25 in September 2000. He was four years old." 14:05  
26

27 And you name a school that provides education for  
28 children with special needs until they reach 19.  
29

1 "P113 was to remain at that school until he was 19  
2 years old. In 2012, when P113 was 17 years old, his  
3 behaviour began to escalate. He often became angry and  
4 he expressed this by hitting staff and his classmates."

14:05

5  
6 And you then, for the remainder of that paragraph and  
7 through to paragraph 7, explain the difficulties that  
8 P113 had in school in more detail. The Panel has seen  
9 all that and I won't read all of that aloud.

14:05

10  
11 At paragraph 7 then, again to summarise, you say that  
12 P113 was admitted as an in-patient to the Iveagh Centre  
13 on 1st December 2014 and he was discharged on 25th  
14 December 2014 because he turned 18 on 26th December  
15 2014, so he couldn't stay there any longer.

14:05

16  
17 To pick up the reading then at paragraph 8, you say:

18  
19 "Following his discharge from the Iveagh Centre, the  
20 school put a plan in place that allowed P113 to return  
21 to school on a reduced and phased return basis."

14:06

22  
23 And you then tell us a little bit more about how that  
24 worked in practice. And again to summarise paragraphs  
25 nine to eleven, you describe the continued difficulties  
26 which P113 experienced at school and then at day centre  
27 and respite and the challenges that he continued to  
28 experience there.

14:06

1 I'll pick up the reading at paragraph 11 then, where  
2 you say:

3  
4 "The time leading up to P113's admission to MAH was  
5 difficult. P113 was not sleeping and often woke at 14:06  
6 five o'clock in the morning. When P113 wakes, either  
7 P113's dad or I have to wake with him, as he cannot be  
8 left unsupervised, because he may hurt himself.

9  
10 The weekend of 8th/9th April 2017, just before P113 was 14:07  
11 admitted to MAH, was extremely difficult at home. P113  
12 was acting out, as something had triggered him. He was  
13 screaming and throwing things. In his frustration,  
14 P113 threw a lamp with a brass candlestick attached  
15 that hit me on the back of my head. P113's dad and I 14:07  
16 tried to calm P113, but we could not. I was extremely  
17 distressed and felt helpless, so I telephoned the  
18 regional emergency social work service helpline to  
19 speak with a social worker. I was told someone would  
20 call me back. A social worker called me back around 20 14:07  
21 minutes later and told me to ring P113's general  
22 practitioner. When P113 acts like this, there is no  
23 benefit in calling his general practitioner, as he does  
24 not have specialist knowledge about the drugs that P113  
25 has been prescribed to manage his behaviours, so he 14:07  
26 could not help. A doctor" - who you name and say who  
27 was based in MAH - "was P113's doctor at the time.  
28 When she met P113, he was usually calm and she did not  
29 witness him during the periods where he was acting and

1 hitting out. As there was no support offered by the  
2 social worker other than the recommendation to contact  
3 his general practitioner, we had to deal with this  
4 experience on our own.

14:08

6  
7 On Monday, 11th April 2017, I brought P113 to the adult  
8 day centre. He was still demonstrating aggressive  
9 behaviour. I told staff in the adult day centre what  
10 happened over the weekend. They contacted SW11, social

14:08

11 worker at the Northern Health and Social Care Trust,  
12 who arranged for P113 to stay in a respite centre for  
13 emergency respite. P113 stayed in the emergency  
14 respite centre overnight on 12th April 2017. The next

15 day, 13th April 2017, I received a phone call from a  
16 member of staff at the respite centre. I do not

14:08

17 remember who called me. I do not remember being told  
18 exactly what happened, but I was aware that P113 was in  
19 the dining area when he took his clothes off and hit  
20 out at staff. I was told that P113 was to be admitted

14:09

21 to MAH and brought there by ambulance and handcuffed to  
22 a police officer. They told me to meet P113 at MAH. I  
23 was very distressed, so I cannot recall exactly what I  
24 did after the phone call, but I remember calling P113's  
25 father at work and said that he needed to come home. I

14:09

26 went home and began to pack some clothes and items for  
27 P113. P113's father met me at home and we travelled to  
28 MAH together. I was in a state of shock that P113 was  
29 to be admitted to MAH, so I do not clearly remember the

1 journey there.

2

3 When P113's father and I arrived at MAH, I remember it  
4 was the evening time. I spoke to a member of staff. I  
5 cannot recall who they were or what they looked like. 14:09

6 I do remember we were in the reception area leading to  
7 a visitors room. I was so upset about what was  
8 happening that I cannot recall many details about the  
9 day that P113 was admitted to MAH. I remember a member  
10 of staff told me that P113 was taken to the assessment 14:10  
11 ward in the Psychiatric Intensive Care Unit (PICU) and  
12 it was best that we did not see him until he was  
13 assessed. P113 was detained under the Mental Health  
14 (Northern Ireland) Order 1986.

15

14:10

16 I remember a staff member from the respite centre" -  
17 who you name - "brought some of P113's personal  
18 belongings to MAH. We brought some belongings for him  
19 too. A social worker, I cannot recall their name, and  
20 a member of staff from MAH, I do not know who it was, 14:10  
21 told P113's father and me that we could not see P113,  
22 as he was being assessed and that we should give him  
23 time to settle in MAH.

24

25 I telephoned MAH the next day for an update on how P113 14:11  
26 was doing. I do not remember with whom I spoke. They  
27 confirmed that P113 remained in PICU and had settled.  
28 I do not remember if they told me if he was given any  
29 medication. I asked if I could visit P113 and was told

1 to wait a few days to allow staff to finalise their  
2 assessments and allow him to settle in PICU.

3  
4 I am not sure exactly when P113's father and I first  
5 visited P113 after he was admitted to MAH, but I think 14:11  
6 it may have been around one week later. I rang every  
7 day to find out how he was and asked when we could see  
8 him. I remember on our first visit we met with P113 in  
9 the visitor room. I remember that PICU was a secure  
10 unit with one big room. I could see into the unit 14:11  
11 through the glass panel. When we visited, P113's staff  
12 took us into the visitor room. I was told what I could  
13 not visit P113 in his bedroom, as this was not  
14 permitted in the interests of visitor and patient  
15 safety. 14:12

16  
17 I remember a staff member told me that P113 liked a  
18 room that had glass in it. When P113 was in PICU, I  
19 only seen his room once, as he was refusing to shower  
20 for the staff. Nothing particularly stood out to me 14:12  
21 about his room, as my concern was to wash and dress  
22 P113.

23  
24 On the first visit to PICU, P113's father and I were  
25 asked to complete a questionnaire setting out what P113 14:12  
26 liked and did not like and what might trigger him.  
27 This was the first of many requests to complete this  
28 questionnaire. When P113 moved to Cranfield 1 and  
29 Cranfield 2, we were asked to complete the same

1 questionnaire. I queried why the information provided  
2 on the questionnaire was not available from P113's  
3 records and was told not all staff had permission to  
4 access patient records on the system, so staff required  
5 us to complete the questionnaire when the authorised 14:12  
6 member of staff was not working. I cannot recall who  
7 told me this.

8  
9 When P113 was admitted to PICU he was under the care of  
10 a Band 4 Staff Nurse called H89. I went to school with 14:13  
11 H89, so I took comfort in knowing that she was caring  
12 for P113. I remember after a visit H89 walked me to my  
13 car and told me that P113 was doing fine and he was  
14 settling well in PICU.

15 14:13  
16 On another visit at the end of April 2017 H89 told me  
17 that P113 was to leave PICU and move to Cranfield 1, as  
18 a young man was to be admitted and needed the bed. She  
19 said that it was good that P113's father and I were  
20 with P113 when he moved to Cranfield 1. This was 14:13  
21 around the end of April 2017. P113's father and I  
22 walked P113 from PICU to Cranfield 1 along with staff  
23 members who brought P113's belongings. I do not know  
24 who they were. As we walked to Cranfield 1, P113  
25 linked on to his father and me and told us that he 14:13  
26 wanted to go home. We tried to reassure him that he  
27 would be okay and that the doctors were going to make  
28 him better. A member of staff showed us to P113's  
29 room. We walked through the ward to get to P113's room

1 and I was told there were 14 beds on the ward. I  
2 remember thinking that Cranfield 1 was a busy place  
3 compared to PICU and there were many staff working on  
4 it. At this time I did not take much notice of the  
5 surroundings, as settling P113 into his new room was my 14:14  
6 priority. P113 had his own room with a television.

7  
8 I visited P113 three times a week in Cranfield 1. On  
9 Wednesdays I visited him on my own as I was off work.  
10 On Fridays and Sundays of each week I visited with 14:14  
11 P113's father. On Fridays we took P113 to Junction One  
12 or to Ballymena. We did not take him home for some  
13 time. We discussed home visits with staff, but we were  
14 encouraged not to take him home until MAH had an  
15 opportunity to settle P113 on the prescribed 14:14  
16 medication.

17  
18 Usually on Wednesday I took P113 out for a walk and we  
19 would go to the Cosy cafe on MAH grounds. If I needed  
20 to go somewhere outside of MAH, I took P113 with me, 14:15  
21 for example to Abbey Centre in Newtonabbey.

22  
23 There were times when P113's dad and I visited P113 in  
24 Cranfield 1 to take him out for the day and found that  
25 he was not shaved or dressed. We were told by staff 14:15  
26 that he refused to allow them to help him get ready.  
27 On these occasions, P113's father and I agreed with  
28 staff that if P113 did not want to shave or dress when  
29 they asked, that we would get him ready, as this was

1 less stressful for P113 and also helped staff. There  
2 was one occasion when I visited P113 and was told that  
3 he was in his pyjamas for the whole day as he refused  
4 to change. This was unusual for P113, so I decided to  
5 take him home for the night to clean him and change his 14:15  
6 clothing.

7  
8 P113 is reluctant to eat with others, as he likes his  
9 own space. P113 finds changes overwhelming and needs  
10 time to transition. When P113 was first admitted to 14:16  
11 Cranfield 1, he sat in the communal dining room with  
12 other residents. When eating, P113 requires his own  
13 space, with minimal noise, so he did not cope well  
14 sitting in the communal dining area. P113 refused to  
15 eat and expressed himself by throwing his food on the 14:16  
16 floor. I do not know how often this happened, as there  
17 may have been times when staff did not tell me. The  
18 only reason I found when P113 had not eaten his dinner  
19 is that I asked if he had when I telephoned MAH every  
20 day for an update. Staff did not tell me voluntarily. 14:16  
21 I was concerned that P113 was hungry, especially as he  
22 loves food. I was told that he would be given toast or  
23 something light to eat. I cannot recall whom I spoke  
24 to about this, but it was another staff member on the  
25 ward. 14:16  
26

27 P113 lost weight when he was in PICU and Cranfield. He  
28 refused to stand on the weighing scales for staff, but  
29 I could see that he lost weight, as his clothes were

1 looser on him. Eventually I was able to convince P113  
2 to stand on scales to weigh him and it showed that he  
3 had lost weight. I think he lost a few kilos.  
4 After a few weeks he was allocated a room where he  
5 could eat alone. I remember there was a big window in 14:17  
6 the room from which P113 could see the nurses' station.  
7 As P113 seemed to enjoy sole use of the room, H67, who  
8 was a Band 5 nurse, who was then promoted to Deputy  
9 Ward Manager, helped set up the room for P113 to use  
10 daily by adding a sofa and television so that he could 14:17  
11 sit there rather than in the communal areas.

12  
13 When I telephoned MAH or asked for updates when  
14 visiting P113 in Cranfield 1, I found that they could  
15 not tell me a lot of information about P113's day. For 14:17  
16 example, as I was aware that PRN medication had  
17 previously been administered to P113, I wanted to know  
18 if and when this was done and the reasons. On one  
19 occasion I asked a member of staff, I cannot recall  
20 their name or description or the date, for details and 14:18  
21 was told that only senior members of staff had access  
22 to the computer system with P113's record on it and  
23 they would pass on my query. Sometimes someone from  
24 MAH followed up and sometimes they did not.

25  
26 When P113's father and I visited P113, we usually took  
27 him out of MAH for the day. We expected him to be  
28 ready to go outside when we arrived, subject to him  
29 complying with staff requests, as agreed with them.

1 There were times when he was in Cranfield 1 and  
2 Cranfield 2 we found him wearing tattered pyjama  
3 bottoms and he would not be dressed and ready to leave  
4 MAH. When this happened, I took P113 to his room and  
5 dressed him. I do not understand why P113 was wearing 14:18  
6 tattered pyjamas, as I regularly buy him new pyjamas.

7  
8 There were issues with P113's clothes going missing in  
9 MAH. When I buy P113's clothes, they are sent to the  
10 laundry in MAH to be labelled. I put the clothes in a 14:19  
11 carrier bag and put a label on it with P113's name and  
12 a note to say that the clothes needed to be labelled.  
13 His grandmother brought P113 a new Adidas top that cost  
14 £45 and we noticed on a visit six months later that  
15 another resident was wearing it. This also happened to 14:19  
16 a top that one of P113's brothers gave to him. One day  
17 when we visited P113, we saw a resident who was much  
18 larger than him wearing his top. Some other clothes  
19 disappeared without explanation. When I raised these  
20 issues with H67 in MAH, I was told that staff did not 14:19  
21 know that the pyjamas and top were for P113 and they  
22 were labelled for another patient. I was also told  
23 that when clothes were sent to the laundry, sometimes  
24 they were returned to different wards. This is what  
25 they say every time clothing goes missing. As P113's 14:19  
26 pyjamas were new, H67 agreed that MAH would replace  
27 them.

28  
29 I take some of P113's clothes home and wash them to

1 prevent them from being lost. If we buy P113 expensive  
2 clothing, we keep them for him to wear when he is with  
3 us. For example, we keep his winter coat in the car  
4 and put it on him before he leaves MAH and we take it  
5 home when we leave P113 back to MAH.

14:20

6  
7 There are times when P113 goes through a phase of not  
8 wanting to wash and refuses to change his clothes when  
9 he was in Cranfield 1. Even so, I expect staff who  
10 were caring for him to make sure that he is clean.

14:20

11 P113 requires time to adapt when he is asked to do  
12 something that is not within his regular routine and  
13 staff in MAH are aware of this, as I have told them.  
14 There were times when I visited P113 and found him  
15 sitting in soiled clothing. When I asked staff why  
16 P113 was sitting in soiled clothing, they told me that  
17 they tried and that P113 refused and lashed out. On  
18 these occasions, I washed P113. Sometimes staff  
19 offered to help, but I prefer to look after him myself  
20 on these visits.

14:20

14:21

21  
22 P113's bedding in Cranfield 1 was, and continues to be,  
23 of poor quality. His duvet is lumpy and very thin and  
24 I do not believe that it keeps him warm. When his  
25 duvet is washed, all the polyester bunches up at one  
26 side. When it is put back on his bed, it has not been  
27 smoothed out and does not fit to the corners of the  
28 duvet cover. I bought him warm throws for his bed to  
29 keep him warm. MAH provide one pillow for P113 to

14:21

1 sleep on that is very flat, so I have repeatedly asked  
2 staff to give him two supportive pillows to sleep on.  
3 When I complain about the quality of the bedding, staff  
4 tell me that duvets and pillows are laundered so much  
5 that they can not provide fresh bedding regularly. 14:21  
6 When I suggest I bring in a duvet and pillows, I am  
7 told that I cannot, as they have to be fire retardant.  
8 I recall that I bought P113 a pillow and wrote his name  
9 on it with a laundry pen, but it disappeared. When I  
10 asked staff where it was, I was told that it was sent 14:22  
11 to the laundry and might have gone to Cranfield 2 and  
12 they would check, but it never returned. This occurs  
13 regularly.  
14  
15 I remember meeting with H93, social worker with Belfast 14:22  
16 Trust, when P113 was in Cranfield 1 during a  
17 multidisciplinary meeting in MAH. H93 suggested that  
18 it might be possible for P113 to come home. I told H93  
19 that there was no day care or respite support  
20 available. I said that nothing had changed with P113's 14:22  
21 behaviour and I cannot possibly take him home. This is  
22 the reason that P113 is in MAH. I cried, as I was so  
23 upset. I told him P113's father and I exhausted all  
24 the options open to us. The school did not look after  
25 P113. The adult centre tried to help and adapt their 14:22  
26 services for P113. Ultimately, no care facility would  
27 accept P113 on a long term basis.  
28  
29 At the time, H93 suggested we could take P113 home I

1 had not been provided with a progress report setting  
2 out what improvements they had seen in P113 since his  
3 admission to MAH. I am aware that the team thought  
4 P113 settled with medication, however I did not believe  
5 this to be true. There were times when we visited that 14:23  
6 P113 seemed to be heavily medicated. He was in a  
7 trancelike state and lacked energy. I believed that  
8 during these times staff had administered PRN to P113  
9 to calm him, meaning medication is given as required.  
10 I wanted to know when this was administered to him and 14:23  
11 asked staff when I visited. I wanted to know if PRN  
12 had been administered. I only spoke to H93 at these  
13 meetings. There was very little contact with him  
14 outside of these meetings.

15  
16 P113 stayed in Cranfield 1 for approximately six to  
17 eight weeks. He was then moved to Cranfield 2. P113  
18 settled relatively well to Cranfield 1 and I do not  
19 know why he was moved to Cranfield 2. I remember  
20 noticing that the layout in Cranfield 2 was similar to 14:24  
21 Cranfield 1. P113 had his own bathroom and living  
22 area. There was a pool table in the room and when I  
23 asked why the pool table was in the room, I was told  
24 that it would be removed.

25  
26 P113 did not settle in Cranfield 2. I am aware that  
27 staff in Cranfield 2 tried a number of medications to  
28 see if they would help him. I knew by P113's behaviour  
29 that he did not settle in Cranfield 2. For example, he

1 wet himself. I was told that he tried to jump over the  
2 nurses station. During his time in Cranfield 2, P113  
3 told me that he wanted to go back to PICU, but I do not  
4 know why.

5  
6 As P113 could not settle in Cranfield 2, he moved back  
7 to PICU for approximately seven weeks in November 2017.  
8 I remember that he was in PICU on his 21st birthday.  
9 P113's father, brothers and I visited him on the PICU  
10 ward and brought balloons, cake and presents to  
11 celebrate. We met P113 in a small room outside the  
12 ward and took some photographs with him. His brothers  
13 only stayed a short while in the room, as P113 can  
14 become unsettled around them, so they waited in the  
15 visitors lobby. During this visit, a member of staff  
16 from PICU said that P113 would be moved to Cranfield 1  
17 in the new year.

18  
19 There were times when P113's father and I visited him  
20 that we were not allowed to enter MAH, as there was an  
21 incident, but we were never told we could not see P113.  
22 A staff member would bring him out to us and we would  
23 sit at the window or stand at the door so P113 could  
24 see us and come out.

25  
26 Before P113 was admitted to MAH, P113's father and I  
27 met with SW11, who told us that a new facility."

28  
29 which you name, and then say:

"Gordon Lyons MLA was assisting us in these discussions and continued to do so when P113 was in MAH. Although P113 was admitted to MAH, there was still a plan to move him to a residential care home. P113's father and I met with the resettlement team that included H186, who was the resettlement officer with the Northern Trust, a team from MAH, a team from the Belfast Trust and staff from MAH. They discussed P113's needs and what the residential care home could do to support him. As the residential care home were due to be the service provider, they met with P113 to carry out a visual assessment and reviewed his notes. Following the assessment, a meeting was set up in early 2017 with the resettlement team in MAH, which I attended by myself as P113's father was working. It was at this meeting that the residential care home told me what they could not accept P113, as they were unable to meet his needs. I was shocked when I heard this, as I was not expecting them to announce the decision on that day or to say no. I remember speaking to H186 after the meeting and she told me that she was not aware that the residential care home reached a decision and that they would announce it at the meeting.

14:26

14:26

14:26

14:27

14:27

I believe that when P113 was first admitted to MAH that I was naive about the level of care that could be given to him. No one forming part of P113's multidisciplinary team managed my expectations by

1 setting out the limitations of the treatment in MAH.  
2 There was no discussion about the assessment process  
3 and I was only aware of a lot of information, for  
4 example, about P113's care at the MDT meetings.

14:27

5  
6 Glynn, who is the father of a patient at MAH and who  
7 had requested to see the CCTV footage from PICU made me  
8 aware of the allegations against members of staff in  
9 MAH in late summer of 2017. Glynn and his wife visited  
10 their son on similar days to P113's father and I and we  
11 often spoke to each other. On the day he told me about  
12 the allegations, I met him in the car park. He did not  
13 provide a lot of information, but said what his son had  
14 been abused in MAH.

14:28

15  
16 Not long after I became aware of the allegations of  
17 abuse, I remember one Friday when P113's father and I  
18 were getting P113 ready to take him out for the day a  
19 nurse called H457 came into his bedroom. I cannot  
20 recall her surname. H457 was crying and she looked at  
21 P113's father and said she was sorry about everything.  
22 At this stage, we were not aware that P113 was  
23 involved, so I remember P113's father and me saying to  
24 each other that it was an odd thing for H457 to say.  
25 We put it down to her having a bad day, or perhaps she  
26 was stressed as the press were reporting on the abuse  
27 claims. In hindsight, I wonder if she may have known  
28 that P113 had been mistreated and that we would  
29 eventually find out.

14:28

14:28

14:28

1  
2 I can clearly recall the day that I was told P113 was a  
3 victim of abuse from staff on PICU. It was a Friday in  
4 May 2018 and I had taken P113 to the Tower Centre in  
5 Ballymena. We were walking through the centre and P113 14:29  
6 was linking me as we walked. I missed a call from an  
7 unknown number and picked up a voicemail from H283,  
8 social worker of safeguarding with Belfast Trust. I  
9 remember saying to P113's father that something must  
10 have happened to P113 at MAH. I did not return the 14:29  
11 call as I could not speak privately. I received a  
12 further call from H283 when we were walking through the  
13 centre. She told me she was reviewing CCTV footage as  
14 part of the investigation into allegations of abuse  
15 against staff at MAH and that she could see from the 14:29  
16 footage that P113 was involved in one or two incidents.  
17 I felt completely numb and sick. I told her I could  
18 not speak to her, as I was in the shopping centre. I  
19 think I said to her that I would like to meet to  
20 discuss what she said. I did not want to talk about 14:30  
21 the incidents when I was with P113, as he knows if  
22 something is wrong by the tone of my voice and I did  
23 not want to upset him. I was upset that she told me  
24 what happened to P113 over the telephone, as I think  
25 she should have told me in person, especially as I 14:30  
26 visit P113 three days a week in MAH. Furthermore,  
27 staff at MAH were aware that P113 was with me at the  
28 time and I feel that this should have been considered  
29 before ringing me and upsetting our family time

1 together.

2

3 Following the call from H283, P113's father and I met  
4 with H411, Safeguarding Manager with the Belfast Trust,  
5 on 8th June 2018. As Gordon Lyons MLA was supporting 14:30

6 our family in trying to move P113 out of MAH, we asked  
7 him to attend the meeting with us. We met with H411 in  
8 the administration building at MAH. She refused to  
9 allow Gordon Lyons into the meeting, as she told us  
10 that Belfast Trust required written consent from P113's 14:31

11 father and I that had to be approved in advance by  
12 senior management. She said that there were criminal

13 investigations ongoing and that the information  
14 discussed was confidential. P113's father and I

15 confirmed we consented to Gordon Lyons attending the 14:31  
16 meeting and discussing P113's medical records.

17 However, H411 would not accept this as consent, as  
18 consent was not provided in writing. Gordon Lyons was

19 not permitted to attend the meeting, so P113's father  
20 and I met with H411 without him. 14:31

21

22 In preparation for the meeting with H411, I wrote out  
23 questions that I wanted to ask her. I wanted to know  
24 what happened to P113 and who was responsible. I also

25 wanted to tell her how I felt about the way in which I 14:32  
26 was told about the incidents on the telephone. H411

27 began the meeting by explaining her role and that she  
28 would answer any questions that she could. She said

29 that she had information to give us about adult

1 safeguarding and the PSNI investigation. She  
2 acknowledged that the investigation was frustrating for  
3 parents and carers, as only limited information could  
4 be provided, as they did not want to jeopardise the  
5 PSNI investigations. 14:32

6  
7 I told H411 about the call I received from H283 and  
8 that I thought she was very unprofessional to tell me  
9 when I was not at home and did not have privacy to  
10 speak to her. I said that a telephone call is not a 14:32  
11 good way to break such bad news to parents. Staff at  
12 MAH knew that I visited P113 three days a week, so they  
13 could have told me in person or arranged to meet there.  
14 She said she was not aware of this. H411 said that  
15 making telephone calls to report incidents to carers 14:33  
16 was 'never easy' but she accepted how I felt. She said  
17 that they try to avoid reporting incidents on a Friday  
18 afternoon as they do not want to upset people over the  
19 weekend, when there would be no-one available to speak  
20 with them. 14:33

21  
22 I do not think she understood how upset I was by the  
23 call. She told me that along with H283 and H49, Senior  
24 Social Worker for Safeguarding with Belfast Trust, they  
25 were reviewing the CCTV footage. She told us that the 14:33  
26 investigation was bigger than anticipated and that  
27 Belfast Trust were recruiting additional people to  
28 review it, including retired staff. I do not know if  
29 recruitment was limited to Belfast Trust or if other

1 Trusts were involved."

2

3 Moving then to paragraph 33, you start with "she", and  
4 by "she" you mean H411.

5

14:34

6 "H411 told us that she had worked as a social worker  
7 for 35 years and was passionate about people. She said  
8 that she did not want staff to wriggle out of anything.  
9 She said 99% of the staff in MAH were excellent. She  
10 said that H283 and H499 were to speak to the MAH staff  
11 involved in the incidents to relay that the behaviour  
12 seen on CCTV footage was not acceptable. We were not  
13 advised of the names of staff involved. We were told  
14 that unannounced safeguarding checks were to be carried  
15 out on the wards."

14:34

14:34

16

17 Then picking up at paragraph 36, you say:

18

19 "As P113's care and social worker fell under the remit  
20 of the Northern Trust, I asked H411 if the team were  
21 aware of the incidents involving P113. P113's father  
22 and I were aware of three incidents at the time of the  
23 meeting and I told her that I did not want P113 to stay  
24 in MAH. She told me that the CCTV footage was reviewed  
25 by the Belfast Trust and that Northern Trust was not  
26 involved in the investigation process, but they are  
27 aware that P113 was the subject of some incidents.

14:34

14:35

28

29 I found that H411 did not answer my questions at the

1 meeting. I said to her at the end of the meeting that  
2 I did not believe that she told us anything  
3 confidential that Gordon Lyons MLA could not have  
4 heard. As the meeting was coming to an end, she said  
5 'out of every bad situation comes good'. I do not know 14:35  
6 what she meant by this, but I found it very  
7 insensitive. I felt that she was implying that good  
8 things came out of my son being abused. I disagree. I  
9 left the meeting very upset after what she said."

10  
11 Then I'm going to pick up the reading at paragraph 40.  
12 You say:

13  
14 "Belfast Trust invited family members and carers of  
15 patients who were still in MAH to a meeting on 24th 14:36  
16 November 2018. The meeting was held in the Portland  
17 Building at MAH. Only four or five families attended.  
18 The meeting was arranged to discuss a report published  
19 following a safeguarding review after the allegations  
20 of abuse were made. The report is called "A Review of 14:36  
21 the Safeguarding at Muckamore Abbey Hospital - A Way to  
22 Go". A copy of the report is enclosed at Exhibit 2.

23  
24 The report was prepared by a Review Team, who found  
25 that 'people with learning disabilities should not have 14:36  
26 to live at Muckamore Abbey Hospital and that the  
27 management and practitioner skills and efforts required  
28 to effect modest change on patients lives are better  
29 spent in creating high quality community services.'

Margaret Flynn was the Chair of the Review Team. One member of the Review Team that I remember in particular" - who you name - "was a parent of a disabled adult son. Her son was not a patient or former patient of MAH. She told us about her son and how she managed him so that he was able to stay at home. She said that she would never send her son to MAH. I felt this comment was inappropriate. She did not know our circumstances and how we exhausted all of our options to keep P113 at home. His admission to MAH was out of our control, as we did not voluntarily admit P113 to MAH. We wanted P113 to leave MAH from the day he was admitted and tried to resettle him in the community, without success. I thought what she said was thoughtless and insensitive. However, the other members of the Review Team were very professional.

When the meeting ended, I spoke to Marie Heaney, Director of Adult Social and Primary Services within the Belfast Trust. I told her that I found the meeting overwhelming and that it was difficult for me to take in what the Review Team said. I told her that P113's admission to MAH was a last resort, as respite could not care for his challenging behaviours, all day care facilities we had previously used could no longer take him and our family had horrendous time with P113 before he was admitted to MAH, we were at our wits end. She offered to meet me another time to discuss my concerns.

28  
29

I attended a meeting with Marie Heaney in the administration building at MAH on 11th December 2018. I cannot recall how the meeting with Marie Heaney was arranged. I met with her by myself. I think that the Assistant Director in the Belfast Trust was also there. Marie apologised on behalf of the Belfast Trust and acknowledged that it failed the loved ones of patients at MAH. She assured me that Belfast Trust are taking the allegations and investigation very seriously. She told me that staff were to be offered further training and senior management would carry out safeguarding spot checks at any time during the day and night. I said to her that I did not take comfort from this, as I believed safeguarding checks were already in place and they did not uncover the abuse that took place, so she could not guarantee that P113 would not be subject to abuse again. Marie Heaney told me there were plans to secure more care providers so that people like P113 who are still in MAH could leave and live in the community with all the support that they required. She told me that disabilities in Northern Ireland, particularly autism, were growing and forward planning to meet assisted living needs was required.

14:38

14:38

14:38

14:39

14:39

Following the meeting, I received a letter from Marie Heaney dated 20th December 2018. A copy of the letter is enclosed at Exhibit 3. The letter provides an overview of what we discussed and offered psychological

1 services to my family.

2

3 In May 2018 P113's father and I attended a resettlement  
4 meeting with the multidisciplinary team at MAH, who  
5 were implementing a two year resettlement plan. It was 14:39  
6 proposed that P113 would move to a residential unit.  
7 The plan to place P113 in the residential unit came  
8 following the residential unit's assessment and was  
9 proposed by H186, Resettlement Co-Ordinator. She  
10 invited P113's father and me to walk around a bungalow 14:40  
11 that was being renovated that maybe suitable for P113.  
12 It was proposed that P113 would live with one other  
13 male resident. After seeing the bungalow, I was so  
14 happy that P113 would be moving out of MAH into his own  
15 home. 14:40

16

17 I attended a number of meetings to discuss the  
18 resettlement plan with the MDT. I attended those  
19 meetings on my own, as P113's father was working. A  
20 lot of people attended the meetings to discuss the 14:40  
21 multidisciplinary assessments of P113's needs. The  
22 team included a consultant psychiatrist, I cannot  
23 recall their name; H500, Resettlement Community Nurse  
24 for Learning Disability; H67, Staff Nurse from  
25 Cranfield 1; H259, Resettlement Social Worker; H501 14:40  
26 from MAH behavioural services; and H193, occupational  
27 therapist.

28

29 I remember saying during one meeting that there were

1 too many people in the room for me to understand what  
2 they were saying. Everyone in that room was aware of  
3 how complex P113's needs were and the care and support  
4 needed to ensure his move to the residential unit was a  
5 success.

14:41

6  
7 The resettlement team in MAH managed P113's  
8 resettlement to the residential unit. H299, who is a  
9 Community Integration Project Co-Ordinator in MAH and  
10 part of the resettlement team, arranged for P113 to  
11 attend with a doctor" - who you name - "consultant  
12 psychiatrist with Belfast Trust, who assessed P113's  
13 capacity to provide his consent to proposed  
14 restrictions for placement at the residential unit.

14:41

15 The proposed restrictions included no access to his  
16 finances, being given medication on a PRN basis when  
17 agitated, having limited access to kitchen areas  
18 because of the presence of dangerous equipment, having  
19 one to one staffing, having toiletries and razors  
20 locked away, having a door alarm on his bedroom. The  
21 doctor examined P113 and found that he did not  
22 understand the information provided and he lacked  
23 capacity to give informed consent due to his  
24 intellectual impairment. A copy of the report dated  
25 19th March 2019 is included at Exhibit 4.

14:41

14:42

14:42

26  
27 A welfare report for best interests considered was  
28 prepared by H259, who was P113's social worker with the  
29 Adult Learning Resettlement Team employed by the

1 Northern Trust based in Magherafelt Community Services  
2 Centre. Her report notes P113 is 'considered a  
3 vulnerable adult and is at risk of potential  
4 exploitation.'

14:42

5  
6 The report details the proposed community care plan.  
7 Two staff members were to provide P113 with care 24  
8 hours a day and support him with his personal care.  
9 P113 was assessed as no longer requiring hospital input  
10 and, therefore, a community placement is required to  
11 meet P113's needs to maintain him safely within the  
12 community. P113 is currently a delayed discharge  
13 patient. A copy of H259's report is attached at  
14 Exhibit 5.

14:42

15  
16 There was a delay in moving P113 to the residential  
17 unit, as there were not enough staff to care for his  
18 needs 24 hours a day, as required under his care plan.  
19 I was aware that the residential unit was under the  
20 management of."

14:43

21  
22 A person who you name. And you say the manager worked  
23 in the Kingscourt Residential Home in Templepatrick,  
24 which was behind the residential unit and they're all  
25 under the umbrella of Manor Healthcare.

14:43

14:43

26  
27 "When the residential unit purchased the bungalow, the  
28 manager was to manage it. I remember that the  
29 residential unit regularly advertised job vacancies and

1 had difficulty securing staff. The bungalow was  
2 unfurnished, so before P113 moved in, P113's father and  
3 I purchased a sofa, chairs and bed for him. On 25th  
4 September 2019, P113 moved into the bungalow at the  
5 residential unit. 14:44

6  
7 It was agreed by the Belfast Trust, the Northern Trust,  
8 the residential unit and MAH that P113 was to remain  
9 listed as a patient in MAH and was not to be discharged  
10 until he was settled in the residential unit. 14:44

11  
12 As part of the care package to ensure the transition  
13 from MAH to the residential unit went as smoothly as  
14 possible, staff at MAH were to support Manor Healthcare  
15 to show them how to care for P113's needs to help him 14:44  
16 settle in the new environment. I recall being told by  
17 the manager of the residential unit that it was best if  
18 MAH staff stopped attending with P113, as he became  
19 unsettled when they left.

20 14:44  
21 After approximately three weeks, I received a telephone  
22 call when I was at work from a lady from Manor  
23 Healthcare. I cannot be sure of her name, but I  
24 believe she was a senior manager. She told me that  
25 P113 threatened to hit another resident, so he had to 14:44  
26 leave. She contacted MAH to say the placement had not  
27 worked out and P113 was to be admitted again to MAH.  
28 P113's father and I collected P113 from the residential  
29 unit to bring him to MAH. We parked at the back of the

1 bungalow and entered through the back door."

2  
3 And you name some staff who met P113's father and you,  
4 along with a female nurse from MAH, who again you name.  
5 And you say:

14:45

6  
7 "The owners of Manor Healthcare were also there. P113  
8 was sitting in the living room in a daze and looked  
9 remorseful, which is common after he acts out. The  
10 Manor Healthcare representative told me that the final  
11 straw came when P113 threatened hit the other resident.  
12 She asked P113's father and myself if we wanted to  
13 speak to the owners, who were in another room, as it  
14 was their decision to remove P113 from the residential  
15 unit.

14:45

14:45

16  
17 The Muckamore staff member said she would take P113  
18 back to MAH, but I said that P113's father and I would  
19 take him back. My priority was to remove P113 from the  
20 residential unit and bring him back to MAH. I began to  
21 pack up P113's clothes and belongings, as I brought a  
22 holdall. The manager gave me plastic bin liners and  
23 offered to help me. I refused, as I was very annoyed.  
24 We went into the living room, where the owners were  
25 sitting and one said that there was no chance of them  
26 changing their mind. He was very blunt and rude. He  
27 said the decision had been made and the relevant people  
28 contacted.

14:46

14:46

1 P113's father sat with P113 whilst I was packing his  
2 things. We took P113 to MAH, where he went back to his  
3 room in Cranfield 1. I believe the reason P113's stay  
4 in the residential unit was not successful was due to  
5 the lack of staff training to care for P113's complex 14:46  
6 needs. "

7  
8 Then I'm going to move on and pick up the reading at  
9 paragraph 55, which is at page 30, if you have that.  
10 And you say there: 14:47

11  
12 "After I found out about the incidents involving P113,  
13 I was invited to meet H183, Assistant Director of the  
14 Northern Trust and the adult safeguarding specialist  
15 within the Northern Trust, who were both based in 14:47  
16 Holywell Hospital, Antrim. I met with them in Holywell  
17 Hospital on my own. I cannot recall the date of the  
18 meeting. They did not discuss the abuse  
19 investigations, but tried to reassure me that P113  
20 would be resettled in the community. I told them how I 14:47  
21 felt about P113 being in MAH since I found out about  
22 the abuse and how I do not want him to stay in there  
23 any more. I am concerned that P113 will become too  
24 institutionalised and this may lead to him being unable  
25 to settle in the community. I told them that I want 14:47  
26 the resettlement to progress so that P113 can start a  
27 new chapter. They told me they had two years to  
28 resettle the remaining patients in MAH and they would  
29 do their best to find P113 the right place to live.

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28  
29

P113 remains in Cranfield 1 today. He still has his own room. I have always worried about P113's welfare and safety. Now that I am aware that P113 was abused in MAH, I worry even more. I expressed my concerns to H498, Safeguarding Social Worker in the Belfast Trust, who is responsible for safeguarding in MAH and she agreed that staff would report any incidents involving P113.

14:48

14:48

I also want to know when PRN has been administered, especially if it is given to him when he is due to come home, as this affects how P113 feels during his stay. PRN is supposed to be used as a last resort and I am concerned what PRN is used as a calming method rather than assessing that P113 needs it. When P113 has been prescribed PRN, he is very tired and lethargic. I can see it in his eyes when he is heavily medicated. His mouth falls open, causing dribble to flow down his chin and on his clothes. When the medication wears off, he is cranky, like someone with a hangover. This is not normal for P113.

14:48

14:49

Despite my requests to be told when PRN is administered, I am still not informed when it happens. I have to ask staff, which makes me feel uncomfortable, as I am only ever given a short and what I feel is often a dismissive reply that they would come back to me. I feel that I should be told what medication they

14:49

1 are giving my son. I do not know when the last time  
2 P113 got PRN was.

3  
4 P113 was at home just before Christmas in 2022 when I  
5 noticed that he had a bump on his head and bruising on 14:49  
6 his arms. I asked H498 what happened. She contacted  
7 me by text message on 3rd January 2023, advising that  
8 an incident occurred on 16th December 2022 where P113  
9 had repeatedly banged his head on fire doors and chased  
10 staff. PRN was provided and medical level 3 handholds, 14:50  
11 three minutes sitting was used as restraint. The notes  
12 record that P113's father picked P113 up at 11:30 p.m.  
13 She also reported the use of PRN on 21st of December  
14 2022. A copy of her text message is marked Exhibit 6.

15 14:50  
16 My main contact in MAH is H502, Deputy Charge Nurse in  
17 Cranfield 1. I understand H502 is agency staff. There  
18 is a patient in Cranfield called P133 who comes into  
19 P113's room. He is a big man. He has complex needs  
20 and requires one to one care. P113 was due to come 14:50  
21 home on 5th of January 2023, when I received a  
22 telephone call from H503, who is a disability nurse in  
23 MAH, I cannot recall her surname, who told us about  
24 that P133 went into P113's bedroom while he was  
25 sleeping and slapped him on his head. When I was told 14:51  
26 about the incident, I was upset. I texted H498 at 9:00  
27 p.m. that evening and told her I was very concerned  
28 that this would happen again. She said that she would  
29 liaise with the safeguarding team and add this incident

1 to her investigation. When P113 came home, he  
2 repeatedly talked about how P133 hit him.

3  
4 Safeguarding within MAH carried out a risk assessment.  
5 P113's bedroom is through double fire doors and down a 14:51  
6 corridor. Cranfield 1 is a v-shaped building. P113's  
7 bedroom is first on the right on one side of the v and  
8 P133's room is on the other side down the corridor to  
9 the left. The doors are always left open, so I  
10 suggested to H504 that they be closed or some sort of 14:51  
11 deterrent was added. To

12  
13 Prevent P133 from coming into P113's bedroom, staff  
14 changed the lock on the door to a round single cylinder  
15 deadbolt that can only be opened from the outside with 14:52  
16 a key. If P113 wants to leave his bedroom, he has to  
17 turn the handle on the inside and pulls the door open.  
18 Photographs of the handle in P133's bedroom are  
19 enclosed at Exhibit 7.

20 14:52  
21 P133 has also hit P113 when he is in the day room in  
22 Cranfield 1. The day room is for P113's sole use and  
23 he particularly enjoys looking out the window. On  
24 several occasions P133 has come into the day room and  
25 hit P113, at least four times that I know off. 14:52  
26

27 H502 reported an incident to me where P133 went into  
28 the day room and hit P113 when staff were distracted  
29 giving out medicine to residents and there were other

1 people on their break. They should allow staff to take  
2 breaks when medication is being administered. "

3  
4 should that be they should not allow staff?

5 A. Yeah.

14:52

6 3 Q. So I'll read that in:

7  
8 "They should not allow staff to take breaks when  
9 medication is being administered.

10  
11 The day room is quite big and has a window at the end  
12 of it where P113 sits. I was concerned how long staff  
13 left P133 unsupervised, as he had time to get to the  
14 room, walk across the room and hit P113. When  
15 discussing the issue with H502 and H503, I suggested  
16 that they make the direct route from the door to the  
17 window more difficult for P133 to walk through, for  
18 example by placing a Chair near P113. The response was  
19 that the chairs are heavy, so they cannot be removed.

14:53

14:53

20  
21 To prevent P133 from going into the room, H504,  
22 Investigating Officer of Adult Safeguarding, arranged  
23 for the day room to be locked when P113 was in it. The  
24 lock was similar to a single cylinder deadbolt that can  
25 only be opened from the outside with a key, but it had  
26 indents on the knob. P113 has poor motor skills and  
27 cannot hold a fork or pencil, so turning a stiff lock  
28 is difficult with him. I raised this with H504 and  
29 told him that I looked at the lock on the day room and

14:53

14:53

1 I found it stiff, which would make it difficult for  
2 P113 to use, as he does not know to turn it right  
3 around. Staff at MAH told me that when P113 could not  
4 open the door, he taps the window to get their  
5 attention and someone will open the door. I said to 14:54  
6 H504 that I did not like this, as I was concerned that  
7 the lack of freedom for P113 to leave the room when he  
8 wants would make him feel trapped. In addition, I  
9 wondered how long it takes for staff to hear P113 and  
10 open the door, especially when they are dealing with 14:54  
11 other patients. H504 said that he spoke to staff on  
12 the ward, who said that P113 was able to turn the lock  
13 and open the door. I asked for a bigger lock to be  
14 fitted. H504 agreed to look at the other options.

15  
16 A new handle was put on the room, but this was harder  
17 to open. H502 said that P113 could not open the door  
18 with the new handle. The initial cylinder-type lock  
19 was put back on the door and remains there. I believe  
20 that staff only lock the door when P133 is around and 14:55  
21 leave it open otherwise. Attached at Exhibit 8 are  
22 photographs of the lock on the inside and exterior of  
23 the day room and my text exchange with H504.

24  
25 Staff have told me that P133 has hit P113 four times. 14:55  
26 Although MAH is taking measures to prevent P133 hitting  
27 P113, I feel that they should take steps to ensure that  
28 patients who are more likely to hit out should be  
29 supervised to avoid this from happening, rather than

1 waiting to deal with the issue following complaints  
2 from peers.

3  
4 H502 sent me an email on 4th May 2023 advising that  
5 P113 had been taken to a doctor as his left ear was 14:55  
6 swollen due to trauma from P113 hitting it. I was told  
7 that P113 kicked off, but I do not know why. I  
8 understand 'kicked off' to mean that P113 was shouting,  
9 screaming, hitting out, biting his hand and banging his  
10 hand against his ear. 14:56

11  
12 P113 came home on 31st May 2023 and I noticed that he  
13 had a large black bruise along his left forearm and his  
14 left ear was swollen. H502 contacted me on either 23rd  
15 or 24th May 2023, before P113 became home, and was told 14:56  
16 that there had been an intervention. I raised this  
17 with H498 and she asked if I wanted to refer the matter  
18 to the Safeguarding team. I told her that I wanted the  
19 incident to be referred to Safeguarding. It was  
20 investigated and reported that P113 had been upset or 14:56  
21 resisted something and this is how he sustained the  
22 bruising. She also said that she 'will remind staff to  
23 request to notify next of kin when physical  
24 intervention is used'. I am not informed when physical  
25 intervention is required unless I ask. 14:56

26  
27 The Northern Trust continue to work towards  
28 implementing a plan to move P113 out of MAH  
29 permanently. P113's father and I spoke to H186 in

1 August 2021, who told us that she might have found a  
2 suitable placement for P113 in a residential home which  
3 is part of Gold Healthcare. P113's father and I  
4 visited the residential home with H186 for the first  
5 time on 22nd September 2021. She showed us the 14:57  
6 accommodation that P113 will live in. I am impressed  
7 with what I have seen at the residential home. Each  
8 resident has their own bedroom, with a television and a  
9 wet room. Outside each room is a secure patio area  
10 that the resident can sit in. There are communal 14:57  
11 areas, one of which has windows that I know P113 will  
12 like to sit and look out at.

13  
14 In May 2022 parents and carers of the residents who are  
15 resettled in that residential home were invited to a 14:57  
16 meeting with H304, Lead Resettlement Officer for the  
17 Northern Trust and the Assistant Director for Learning  
18 and Disability Services in the Northern Trust, who are  
19 part of the resettlement team. The meeting was held in  
20 person or over Zoom. P113's father and I attended the 14:58  
21 meeting in person. They said there was potential for  
22 some residents to be resettled within the residential  
23 home, as they are offering accommodation that may be  
24 suitable. We were told that an eight-bedroom unit  
25 purpose-built for people with disabilities so that they 14:58  
26 may live in supported living accommodation.

27  
28 I remember that during that meeting H411 joined via  
29 Zoom. As I was disgusted by the way that H411 spoke to

1 P113's father and I at our meeting on 8th June 2018 and  
2 how the report of the first incidents were made to me,  
3 I left the room when she began to speak.  
4 As a family, we are now planning P113's move to the  
5 residential home. Staff from the residential home have 14:59  
6 met with P113 and are working with MAH to familiarise  
7 him with the proposed new accommodation and ensure an  
8 appropriate care package is in place before he leaves  
9 MAH. It has been confirmed that P113 has been accepted  
10 into the new residential home. P113's father and I met 14:59  
11 with P113's MDT fortnightly to prepare P113 for  
12 resettlement.

13  
14 This experience has been very traumatic for me and my  
15 family. We never wanted P113 to stay in MAH for as 14:59  
16 long as he has, but we have had no choice. I trusted  
17 staff at MAH and the Northern Trust to look after P113.  
18 I wonder how anyone can be so cruel. I feel completely  
19 let down by MAH, Belfast Trust and the Northern Trust.

20 14:59  
21 Finding out that P113 was abused has affected my life  
22 dramatically. In June 2019 I took sick leave from work  
23 for one month, as processing what I was told happened  
24 to P113 was too much for me to cope with. This  
25 affected my husband and sons. I do not talk about this 15:00  
26 experience to anyone outside my immediate family. I  
27 want to protect my sons from the reality of what P113  
28 has suffered. When I talk about what happened to P113,  
29 I feel physically sick and very emotional, which causes

1 me to lose my appetite and feel depressed.

2

3 P113's father and I will not live forever, so I want to  
4 ensure that he finds a permanent home to live in where  
5 all his needs are met and his brothers do not have to 15:00  
6 worry about him as I do. I want P113 to leave MAH as  
7 soon as possible and I worry that the longer P113 stays  
8 in MAH, the more difficult it will be for him to settle  
9 in the residential home. As a mother, all I want is  
10 for P113 to live in his own home, where he is well 15:00  
11 cared for, safe and happy. "

12

13 P113's mum, that's the end of your statement. And if  
14 you flick over the page, you'll see at section 5 that  
15 you have signed it and dated it 6th September. So, 15:00  
16 having heard me read that out, can I ask you, just  
17 first of all, are you content to adopt that as part of  
18 your evidence to the Inquiry?

19 A. I do.

20 4 Q. I have been reading for some time now. would you like 15:01  
21 a break before I start asking you questions? I think my  
22 questions will probably take about half an hour in  
23 total.

24 CHAIRPERSON: I think we ought to have a break, for the  
25 witnesses and for you. So if we just took 10 minutes 15:01  
26 or so now.

27 MS. KILEY: Yes, that's fine.

28 CHAIRPERSON: Is that all right? Okay.

29 MS. KILEY: Thank you Chair.

1 CHAIRPERSON: okay, we'll just take 10 minutes. Thank  
2 you.

3

4 THE HEARING ADJOURNED FOR A SHORT TIME

5

15:01

6 THE HEARING RESUMED AS FOLLOWS:

7

8 CHAIRPERSON: Thank you.

9 5 Q. MS. KILEY: Okay, P113's mum, you heard me do a lot of  
10 reading there and you've given a comprehensive  
11 statement, so the good news is I'm not going to ask you  
12 to repeat everything that you've already said in your  
13 statement, but there are a few issues that I just want  
14 to ask you some more questions about, okay? The first  
15 was a comment that you made about how long you thought  
16 P113 would be in Muckamore and your expectations for  
17 him. One of the things you said was Muckamore was not  
18 a place that you wanted your son to end up in. why did  
19 you feel that way? 15:19

20 A. well, my understanding was that P113 would get the  
21 treatment he needed and then he would move out to  
22 either supported living or residential. And we had  
23 kind of talked about this before P113 actually ended up  
24 in Muckamore, we'd sort of talked to a social worker  
25 about this and just, like, looking, you know, further  
26 down the line, that we weren't getting any younger, 15:20  
27 P113 wouldn't be at home forever, you know, and we had  
28 sort of talked about this before the breakdown really.

29 6 Q. About what would happen to him if something like this

1           happened, if a crisis situation happened?

2           A.    Yeah, or something happened to one of us, we've talked  
3           about this as well. But Muckamore was never in the  
4           horizon, you know, to be a permanent place.

5        7    Q.    And one of the other things you said was that when P113 15:21  
6           was first admitted to Muckamore that you felt that you  
7           were naive about the care that they would give him.  
8           What did you mean by that? What do you think you were  
9           naive about?

10       A.    Well, we didn't know what to expect. And there wasn't 15:21  
11       very many meetings to give us updates. And it seemed  
12       to be me that was asking all the questions, you know?  
13       And then in the statement I said that there was a  
14       social worker for the Trust that told me that I could  
15       take him home. But I mean, we didn't know what had 15:21  
16       happened. I knew that P113's behaviour hadn't changed,  
17       I knew that he was probably on a lot more drugs than he  
18       was when he went in. But I mean, things hadn't changed  
19       for us and everything back home had broke down - you  
20       know, like the day centre couldn't handle him, respite 15:22  
21       facility couldn't take him. So, like, every door  
22       seemed just to close. So nothing had really changed.  
23       And it was like 'right, he's been here for a while, so,  
24       you know, just take him home and see what happens'.

25       8    Q.    And at that, or during that conversation was there any 15:22  
26       discussion about support that might be offered to you  
27       at home to help you do that?

28       A.    I can't really remember. Because there's been so many  
29       meetings I've been at, so I can't really remember what

1 really was talked about. Like, I did say to the social  
2 worker at that meeting that that's not what has been in  
3 my mind, that it's not going to solve anything me  
4 taking him home again, his behaviour's still going to  
5 be the same. Our family life was zero. You know, I do 15:23  
6 think of the things that happened at home and it just  
7 wasn't good.

8 9 Q. And when P113 was admitted to Muckamore then, what sort  
9 of treatment did you expect him to get to help him with  
10 those behaviours? 15:23

11 A. I did expect that he would be on maybe a different type  
12 of medication that would maybe, you know, keep him  
13 quite calm, maybe some type of therapy that, obviously,  
14 we didn't know of that would change things.

15 10 Q. And at the time of P113's admission, did anyone explain 15:23  
16 to you the type of therapy that he would be offered or  
17 treatment of any kind?

18 A. From what I remember, there was not much chat of what  
19 was to happen. And in fact further down the line - and  
20 I can't really remember - there was a handbook give 15:24  
21 about Muckamore Abbey Hospital about if you'd any  
22 questions etc., it was colour photocopied brochure.  
23 But we didn't get that until P113 had been there for  
24 about a year.

25 11 Q. And before that time, did you have a named contact in 15:24  
26 Muckamore, a member of staff who you could go to if you  
27 had concerns?

28 A. There was always a key nurse, if that's the right  
29 wording. And it did change; because P113 had actually

1 went to three different places, his key nursed changed  
2 so many times. And then maybe staff moved, so then  
3 there'd been somebody else. So you were never quite  
4 sure of who to contact. And maybe some of the times  
5 when I was visiting, they were actually on a different 15:24  
6 shift. So you seemed just to be going from pillar to  
7 post trying to get answers and trying to get to talk to  
8 somebody.

9 12 Q. What about the MDT meetings? You refer to sometimes  
10 attending MDT meetings in your statement. How often 15:25  
11 did they happen?

12 A. The MDT meetings that I attended only -- I only  
13 attended when there was actually a place that had been  
14 located for P113 to go to. And that's when I started  
15 going to these MDT meetings. They seemed to have them 15:25  
16 once a week. I wasn't involved in the previous ones  
17 until they had highlighted where P113 was going to be  
18 placed.

19 13 Q. Right. So the MDT meetings were only a part of the  
20 resettlement process, is that right? 15:25

21 A. Yeah, the ones that I attended.

22 14 Q. Did you have any sort of regular meetings with staff at  
23 Muckamore aside from that process to discuss P113's  
24 care or the treatment that he was getting?

25 A. No. Just going into the ward, maybe talking to the 15:26  
26 nurse in charge, you maybe would've had a bit of a  
27 catchup there, but not anything formal.

28 15 Q. Do you know whether P113 received any psychological  
29 therapy in Muckamore or any behavioural therapies?

1 A. Yeah, he did. He did. There was behavioural team -  
2 now, I don't know how effective it was. But when it  
3 did come to him being relocated to the place in  
4 Templepatrick, they seemed to have disappeared. So all  
5 the behavioural support that he was supposed to have 15:26  
6 had and how they worked with him, to me just all  
7 disappeared, there didn't seem to be any support at  
8 all.

9 16 Q. When do you identify that that disappeared? whenever...  
10 A. When P113 had went out to the community, the 15:26  
11 unsuccessful --

12 17 Q. The first attempt at resettlement that was  
13 unsuccessful?

14 A. Yeah.

15 18 Q. Okay. And was it reinstated then whenever he went back 15:27  
16 to Muckamore, was that type of therapy reinstated?

17 A. I don't remember meeting anybody -- there was a lot of  
18 things had happened and then it was obviously  
19 identifying a place for P113 and then Covid. So I do  
20 not remember anybody else, any other behavioural 15:27  
21 professions, professionals, working with P113.

22 19 Q. Do you ever recall seeing a behavioural support plan or  
23 anything with that kind of name for P113?

24 A. Possibly. Yeah, possibly.

25 20 Q. One of the things that you had also mentioned there was 15:27  
26 medication and that you thought P113 might be on a  
27 different kind of medication whenever he was admitted  
28 to Muckamore. You describe a little bit about  
29 medication in your statement and particularly I want to

1 ask you about PRN. Because at paragraph 23 of your  
2 statement you say that when you visited your son, he  
3 seemed heavily medicated, and you said in fact a couple  
4 of times in your statement. Are you able to say how  
5 often that would've happened that you would've observed 15:28  
6 him in a state where you felt he was heavily medicated?

7 A. I couldn't really recall how often, but I would say for  
8 quite a while. We were going up and P113 could  
9 hardly -- he would stumble; we would've been out in the  
10 grounds or I would've took him maybe further afield and 15:28  
11 P113 would've stumbled. There was times you knew that  
12 he was completely -- his eyes were glazed, he would've  
13 been dribbling, you know, he'd just have been in a  
14 trance really. But as I say, unless I asked -- I knew  
15 by just looking at him. And then, of course, once I 15:28  
16 took him back into the ward again I was saying, you  
17 know, 'has P113 received PRN?' And then I would ask why  
18 this was. So it was me asking. There was maybe a few  
19 times I was told of incidents, but it was usually  
20 myself that would've been questioning why and when he 15:29  
21 was given the medication.

22 21 Q. You do mention in your statement times when you  
23 requested to be informed when P113 was given PRN and  
24 you've described there requesting it on certain  
25 occasions, but do you feel now that you are regularly 15:29  
26 informed whenever P113 receives PRN?

27 A. No. The last four weeks that P113 has been in  
28 Muckamore, there's been different things - he's  
29 actually broke a tooth in the last two weeks - and

1 we're waiting on Safeguarding coming up with their  
2 summary of what has happened. I always have to ask  
3 about PRN.

4 22 Q. And whenever you do ask, and in thinking back to those  
5 occasions which you've described in your statement 15:30  
6 where historically you have asked whether PRN has been  
7 administered, what response did you get about why it  
8 had been administered?

9 A. The majority of the time that I was given information  
10 about was that P113 had actually had a bit of a 15:30  
11 meltdown and there was no settling him and PRN was then  
12 given to P113.

13 23 Q. In your statement you said that you were concerned that  
14 PRN was used, what you described as a calming method.  
15 Can you explain to the Panel why you were concerned 15:30  
16 about that?

17 A. Well, probably we know P113 better than anybody, but I  
18 never give P113 PRN when he's at home. And I know it's  
19 a completely different setting. But you can talk P113  
20 out of it, you can talk him out of it. And he gets 15:31  
21 very, very remorseful. It's like this big burst of  
22 energy and he gets violent and he hits and he hurts  
23 himself and, you know, he wants to lash out, but then  
24 he goes into a very calm, remorseful young man and you  
25 can talk him out and he'll actually say he's sorry. 15:31

26 24 Q. That experience that you have of being able to talk  
27 P113 out, do you ever share that with staff at  
28 Muckamore?

29 A. Yeah. P113's dad's the best that can talk P113 down.

1 25 Q. You've said in answer to my question there that you did  
2 discuss that with staff at Muckamore. Did you tell  
3 them the type of ways that you and P113's dad would  
4 use, the things that you would do to try and talk P113  
5 down?

15:32

6 A. If I went in today to collect P113 and P113 tells you  
7 that he's been bad or he tells you that he's lashed out  
8 - and they see me, you know, they've got perfectly good  
9 hearing - and I would say 'you've just had a sad  
10 moment', so I'm going 'don't worry'. So this is the  
11 way I talk him down, and they've seen us demonstrating  
12 this. I would say to P113 -- and I've said to people,  
13 sometimes I'm sure there's people think that 'she's  
14 going doolally', because I actually put a different  
15 accent on and I say 'don't worry', you know, 'it's  
16 fine' and I always say 'you've had a wee sad movement,  
17 so let's move on'. So they see these things, you know?  
18 And I tell them, like I say all the time 'stop staring  
19 at him'. Because when you stare at P113, it attracts  
20 P113. He knows, he reads expressions, he knows that  
21 people are watching him and so he reacts to that. You  
22 know, quite recently I've been up and there's all these  
23 agency workers and there's a guy who's standing peeking  
24 around the corner and I'm going, I actually said to the  
25 senior nurse 'please tell that person to stop looking  
26 round the corner at P113, because that makes him feel  
27 uncomfortable'. It would make me feel uncomfortable.  
28 'This chap has got learning difficulties', like, you  
29 know, 'stop doing that', you know?

15:32

15:33

15:33

15:33

1 26 Q. And you describe there the methods that you would use  
2 to try and calm P113 down and you're saying you would  
3 use those methods in Muckamore whenever you're seeing  
4 P113, is that right?

5 A. Yeah. If P113 tells me he's been upset or he's been 15:34  
6 bad, you know, I try to distract him. And I keep  
7 saying to them 'don't stand around him, don't stand  
8 around him', you know, 'move on, move on'. Like, you  
9 know, P113, it'll be stuck in his wee head and he'll go  
10 on and on and on, you know? And I say, you know, 'you 15:34  
11 just need to do things, you don't need to stand with  
12 him, you just need to move on'.

13 27 Q. And do you think staff have used that information that  
14 you have given them and used that to try and talk P113  
15 down? 15:34

16 A. I think there's been a few staff, in all fairness. I  
17 don't believe now they're still there, but I think  
18 there's been a few staff that probably did use what I  
19 was saying that works best for us. But now the staff,  
20 every day I go in, there's somebody different, so it's 15:35  
21 kind of hard to keep up with the staff. And now that  
22 the two wards are amalgamated, it's even harder.

23 28 Q. I want to ask you a little bit more about your  
24 interactions with the Belfast Trust after you were  
25 informed about incidents that occurred at Muckamore. 15:35  
26 And you've described that in your statement. And in  
27 particular you described a meeting with Marie Heaney on  
28 11th December 2018. And you've provided an exhibit at  
29 page 83 of your statement which I'd like you to turn

1 to, please. There are numbers at the top of the page  
2 and it will say 83, Exhibit 3.

3 A. Mhm-mhm.

4 29 Q. So you can see there that this is a letter from the  
5 Belfast Trust to you dated 20th December 2018. Is this 15:36  
6 the letter that was sent to you following that meeting  
7 on 11th December 2018?

8 A. It was.

9 30 Q. Yes. And you can see if you turn over the page that  
10 it's from Marie Heaney, the person that you met with, 15:36  
11 the Director of Adult Social and Primary Care Services.  
12 And fact just below that you can see it's copied to  
13 Margaret Flynn, who is the author of the report which  
14 you've also referred to your in your statement.  
15 15:36

16 I just want to read out portions of that statement. If  
17 you look back at page 83 you'll see that it's said:  
18

19 "Thank you so much for meeting with us last Tuesday,  
20 11th December 2018. The account of your family 15:36  
21 experience was illuminating and sad. I understand why  
22 you state that 'we didn't have a family life' and that  
23 you want a better life for P113 and for all of you.  
24

25 The decision to place P113 at Muckamore was a last 15:37  
26 resort and it was not the place you wanted him to end  
27 up long-term.  
28

29 I agree with your assessment that the whole system is

1 wrong because of the absence of capable community  
2 support services for your family and for P113,  
3 including support away from his family. P113's  
4 exclusion from other services was upsetting for you all  
5 and the circumstances of his admission were very 15:37  
6 distressing. The staff did not know or did not use the  
7 information you had shared about P113 is so  
8 disappointing. You were told you could not take him  
9 home and you were promised a service which did not  
10 materialize and the insensitive way you were told about 15:37  
11 the incident which caused harm. So many opportunities  
12 were missed. Most particularly, your efforts to share  
13 your expertise and, specifically, effective ways of  
14 encouraging and engaging P113 were disregarded. This  
15 will change. 15:38

16  
17 You were right to challenge the adult safeguarding  
18 policy and procedure and I agree that these failed P113  
19 and others.

20 15:38  
21 I welcome your professional experience and will be  
22 exploring the introduction of family/carer testimonials  
23 to test the quality of care and experience.

24  
25 I wish that he had experienced some of the emotional 15:38  
26 sensitivity that he himself possesses. Despite all  
27 that you have gone through, I hope that you will be  
28 able to continue to work with us to improve P113's life  
29 and others. I will be communicating with all families

1 about this in the new year.

2

3 We spoke briefly about the Trust wishing to offer  
4 psychological services to any family member who would  
5 wish to consider this. "

15:38

6

7 And then some contact details are given which it's said  
8 you can contact if you have any issues to raise.

9

10 There is a reference there in the first page that I  
11 referred to about your efforts to share expertise and,  
12 specifically, effective ways of encouraging and  
13 engaging P113 being disregarded. Is that the type of  
14 thing that you were just referring to, those types of  
15 triggers and ways of talking him down?

15:38

15:39

16 A. When P113 was admitted to Muckamore, we filled in a  
17 questionnaire, a sort of, it was a patient passport, if  
18 you want to call it, of things he liked, things he  
19 didn't like, things that would trigger him. And then  
20 when he was moved to all these, from one ward to  
21 another, the same questionnaire and the same form was  
22 handed to us. We actually said to each other one day,  
23 'what happened to form? I thought it was all on  
24 computer'. But we were told it wasn't and all the  
25 staff didn't have access to the computer system. So  
26 there was a lot of effort went into, obviously, us  
27 telling the staff what we thought worked, but I don't  
28 know what happened that information.

15:39

15:39

29 31 Q. And is that one of the things you discussed with Marie

1 Heaney? And so is that what she's referring to whenever  
2 she says that efforts to share -- refers to your  
3 efforts to share expertise?

4 A. I think I told Marie Heaney my frustrations about  
5 things that I thought could improve. Because after 15:40  
6 all, my meeting this senior person was actually a  
7 fluke, because she met me at the review that Margaret  
8 Flynn had been chairing and it was only that I know she  
9 was being polite and she was asking us what we thought,  
10 how did it go and I actually made a few comments about 15:40  
11 that day and what had been said and we talked about  
12 P113 and why he had been admitted to the hospital and I  
13 guess that's why that meeting then was set up with  
14 Marie.

15 32 Q. There is a promise there when discussing those issues, 15:41  
16 you'll see the line, it says "This will change".

17 A. Yeah.

18 33 Q. P113 is obviously still in Muckamore. Have you seen  
19 any change?

20 A. In what respect? 15:41

21 34 Q. Well, what she says is that she refers to the efforts  
22 to share information and give effective ways of  
23 encouraging and engaging P113 which she says there were  
24 disregarded and she says that that's what's going to  
25 change. Have you seen any change in your communication 15:41  
26 with staff about those things and whether they're using  
27 those ideas that you give them?

28 A. No, I haven't seen any change.

29 35 Q. What about -- there's reference also to exploring the

1 introduction of family/carer testimonials; have you  
2 been asked to give one of those?

3 A. That wasn't my idea, that was Ms. Heaney's idea. And I  
4 guess she wanted maybe myself and my husband to get  
5 involved. But I didn't go down that route. 15:42

6 36 Q. Okay.

7 A. That was probably said at the moment.

8 37 Q. Okay. But that's not something that you have engaged  
9 in?

10 A. No. No. 15:42

11 38 Q. Okay. The final topic that I want to ask you about is  
12 resettlement. You described an earlier failed  
13 resettlement process and in your statement you've given  
14 a significant amount of detail for that. You now  
15 describe the planning that's ongoing for another 15:42  
16 attempt at resettling P113 and the work that's ongoing  
17 in respect of that. So there are MDT meetings, I  
18 think, in respect of that, is that right?

19 A. There are.

20 39 Q. And they're fortnightly? 15:43

21 A. Fortnightly, but with the proposal that they're going  
22 to be weekly very soon.

23 40 Q. Right, okay. And compared to -- so, thinking of the  
24 process now that's being undertaken to prepare P113 for  
25 resettlement and comparing that to the earlier process 15:43  
26 which ultimately failed, do you think that their  
27 preparations this time are better or any different than  
28 before?

29 A. I think they're better. But there is always that doubt

1 at the back of my mind, like, what if it doesn't work?  
2 what's plan B? It's just, it's just the way I'm set up  
3 that I just think is there something going to go wrong?  
4 I'm always thinking maybe on a negative side. But  
5 definitely there's a lot more effort, I have to say, 15:44  
6 everybody seems very committed.

7 41 Q. And do you have any indication of when the resettlement  
8 might take place?

9 A. Before Christmas, we've been told.

10 42 Q. Okay. 15:44

11 A. So...

12 43 Q. Okay. And you have provided the Inquiry, they're not  
13 attached to your statement, but yesterday you helpfully  
14 provided us with some photos that you would like the  
15 Panel members to see of P113, so I think we can bring 15:44  
16 those up now. And if you look on your screen, you'll  
17 see them. So there are six photos and you can see it's  
18 P113 - are these all taken at home?

19 A. Yeah, these are all when P113's home at the weekends.  
20 He just gets the run of the house. 15:44

21 44 Q. Are these recent photographs?

22 A. These are recent. These are probably from Easter until  
23 now.

24 45 Q. And if we keep flicking through them please. He's  
25 enjoying, what, a milkshake there? Some shopping. And 15:45  
26 the last one. So those are the photos that you want  
27 the Panel to see about P113. what would you like the  
28 Panel to understand about what P113's like, what type  
29 of person he is?

1 A. When P113's in good form, he's smiley, he laughs very  
2 heartily. He loves eating. He has to have a magazine,  
3 he lives around his magazine deliveries. And he  
4 actually loves home life, as long as it's his dad and  
5 myself and the dog, he just loves being home with us. 15:45  
6 He's quite sociable when he's out - we try to get him  
7 out - you know, because he knows then people's not  
8 coming with us. He does have -- he's very anxious if  
9 people would come into our space, into our home, he's  
10 still a bit anxious. I'm not saying that every 15:46  
11 weekend's good, but the majority of the weekends is  
12 good at home, you know? It is hard work, but we just  
13 try and keep that time for P113 and we try to keep him  
14 up as long as possible and do things.

15 46 Q. Like the various outings we've seen in the photographs? 15:46  
16 A. Yeah.

17 MS. KILEY: Okay. Well, those are all the questions  
18 that I have for you and I'll pass over to the Panel,  
19 who may have some questions for you.

20 CHAIRPERSON: Yes, Professor Murphy. 15:46  
21

22 P113'S MOTHER WAS THEN QUESTIONED BY THE PANEL,  
23 AS FOLLOWS:  
24

25 47 Q. PROFESSOR MURPHY: Thank you for explaining about 15:47  
26 P113's time in Muckamore. You've said that several  
27 times over you had to do these questionnaires about  
28 what he likes, what he doesn't like, what triggers him  
29 and I was wondering is one of the things he likes lots

1 of activities for him - I don't mean big parties, I  
2 mean activities that he wanted to engage in? Because  
3 looking at your photos, he's out in the community,  
4 shopping, walking the dog. Were those the kinds of  
5 things that you listed as his likes?

15:47

6 A. Yeah. We know that maybe wasn't possible in Muckamore,  
7 but, you know, I had took things in that thought maybe  
8 that P113 could do in Muckamore and never actually seen  
9 him, never actually seen the stuff that I'd brought in  
10 either. It maybe would've been something that they'd  
11 have tried once and then if P113 hadn't engaged, that  
12 was it.

15:48

13  
14 Like, it was a big concern that P113 wasn't getting  
15 out, getting fresh air. This was such a big concern.  
16 Like, it was probably one of -- the sentence that I  
17 kept repeating, that I actually said to an OT 'listen,  
18 if P113 won't go out, put him in a wheelchair. I know  
19 that he can walk, but put him in a wheelchair'. When  
20 P113's behaviour started to escalate, we would've got a  
21 wheelchair to take him, to go through an airport. And  
22 we told them all this. And I said, you know, 'if you  
23 could get P113 out, you could maybe win his trust. You  
24 know, his anxiety might disappear and he could maybe  
25 walk back', you know, 'just get him out in the fresh  
26 air'. And it's all about making that relationship with  
27 P113.

15:48

15:48

15:49

28 48 Q. Yeah.

29 A. But until today, he has never sat in a wheelchair, that

1 I know of, in Muckamore, just to get him out in the  
2 fresh air. He has been out --

3 49 Q. So that was one of the ways you calmed him down?  
4 A. He didn't have to -- P113 was safe, he was in that  
5 chair. You know, I explained that's how P113, I think, 15:49  
6 felt.

7 50 Q. Did he get to go to the day care at Muckamore?  
8 A. They tried briefly. They tried briefly, you know. But  
9 we actually had went over a few times to the day care  
10 with P113, but then he maybe was reluctant to go, maybe 15:49  
11 he refused. And it obviously was having an impact on  
12 P113. And I know sometimes when they said to me that  
13 they maybe tried something, I'm saying 'look, you know  
14 what? Don't force him.' Because if you force P113,  
15 that's a bad experience, and P113 will never do 15:50  
16 anything like that.

17 51 Q. But I guess there might have been some things about the  
18 day care that was just what P113 didn't like. For  
19 example, it might've been very busy it. And sounds  
20 like he likes his own space, he likes to eat on his 15:50  
21 own, he likes not too many people around.

22 A. Yeah, totally.

23 PROFESSOR MURPHY: Okay, thank you.

24 52 Q. CHAIRPERSON: So, just picking up on that same theme,  
25 what is there for P113 to do during the day? when 15:50  
26 you're not taking him out or doing things with him, do  
27 you know what he does do?

28 A. It used to be that there was a person who came in and  
29 would've, it was like aromatherapy. And P113 would've

1 participated usually. But then there was days he was  
2 maybe a bit off, or it was a Friday and he was going  
3 out with us, or he was maybe going to go home, so he  
4 refused.

5  
6 There would've been people coming in, there was people,  
7 I don't know if they still come in, maybe with pets and  
8 things and they would've maybe took some of the animals  
9 into P113's day room, day space. The OTs were in and  
10 out as well, there was some activities they would've  
11 liked P113 to get involved in as well. But it all  
12 depends on P113's mood. It all depends on P113's mood  
13 and how he's feeling. 15:51

14 53 Q. And the resettlement place that you looked at that you  
15 quite liked, is that the same resettlement place that  
16 is being considered for P113 now? 15:51

17 A. Ehm...

18 54 Q. You mentioned the eight-bedroom place that you --

19 A. Yes, yes.

20 55 Q. -- went and saw. 15:52

21 A. Yeah.

22 56 Q. Is that what's being considered for him now?

23 A. Yeah.

24 57 Q. And can I just ask, does that have -- is that a shared  
25 kitchen? 15:52

26 A. There's no kitchen. It's on two floors, so the kitchen  
27 and the team are all upstairs. They get their meals  
28 delivered to them or they can go to a communal area,  
29 depending on the client. They've successfully

1 CHAIRPERSON: okay. well, look, thank you very much.  
2 How are we going to deal with the next part?

3 MS. KILEY: I thought, subject to you, Chair, that we  
4 would deal with P113's dad first, because there is a  
5 statement to be read in that open session. 15:54

6 CHAIRPERSON: And then go to restricted session?

7 MS. KILEY: And then go into restricted session with  
8 both P113's mum and dad, because I won't actually have  
9 any questions and so I don't intend to ask questions  
10 about the matters that are going to be subject to 15:54  
11 restriction.

12 CHAIRPERSON: No, that's fine. Do we need to rise or  
13 can we just switch places?

14 MS. KILEY: we'll just switch over.

15 15:54

16 P113'S FATHER, HAVING BEEN SWORN, WAS DIRECTLY EXAMINED  
17 BY MS. KILEY AS FOLLOWS:

18

19 64 Q. MS. KILEY: Okay, P113's dad - that's what I am going  
20 to refer to you as - we met earlier on this afternoon, 15:55  
21 which probably seems like a long time ago now. But the  
22 good news is that I probably won't be as long with you,  
23 your statement is a little bit shorter than P113's  
24 mum's. So I am going to follow the same process, I  
25 will read out the statement and I'll then have just a 15:55  
26 couple of questions for you.

27

28 So the statement is in front of you. I can see the  
29 family liaison officer helping you with that. Let me

1 know whenever you have it.

2 CHAIRPERSON: It should start straight after the other

3 one and it's...

4 MS. KILEY: It should be at the back of the file.

5 That's it, yeah. 15:55

6 CHAIRPERSON: Does it have 149 at the top?

7 MAH-ISTN-1491?

8 A. Yeah.

9 65 Q. MS. KILEY: That's it. That's yours. And you can see

10 in front of you you've got the cipher list if you want 15:55

11 to follow along to see who I'm referring to whenever I

12 use those references.

13

14 So your statement is dated 6th of September 2023 and

15 you say: 15:56

16

17 "I, P113's father, make the following statement for the

18 purpose of the Muckamore Abbey Hospital Inquiry. There

19 are no documents produced with my statement. Family

20 Liaison Officer FLSW2 attended with me when I was 15:56

21 making this statement.

22

23 My connection with MAH is that I am a relative of a

24 patient who is at MAH. The relevant time period that I

25 can speak about is between 13th April 2017 to the date 15:56

26 of my statement.

27

28 My wife, P113's mother, has provided a comprehensive

29 statement to the Inquiry dated 6th September 2023. I

1 have read her statement and I wish to add the following  
2 information.

3  
4 My son P113 was admitted to MAH on 13th April 2017.  
5 P113 was diagnosed with a severe learning disability, 15:56  
6 autism, conversion chromosome 3 and a tic disorder when  
7 he was 13 or 14 years old. He is under the care of the  
8 Northern Health and Social Care Trust. His appointed  
9 social worker was SW11.

10  
11 P113's mother has set out a history of treatment and 15:57  
12 support provided to P113 and the circumstances that led  
13 to him being admitted to MAH. "

14  
15 Then at paragraph 5 you refer again to P113's admission 15:57  
16 to the Iveagh Centre, which we've already seen in  
17 P113's mum's statement. That took place in December  
18 2014. I'm not going to read that aloud, but in the  
19 final few sentences you say about that:

20  
21 "I remember sitting in the car with P113 and feeling 15:57  
22 distressed, as I did not know what the admission to a  
23 secure unit would mean for P113 in the future. This  
24 was a very uncertain time for me. I tried to keep calm  
25 as I did not want to upset P113. P113 was unaware that 15:57  
26 he was going to the Iveagh Centre. He stayed at the  
27 Iveagh Centre until 25th December 2014, as he turned 18  
28 the following day. "

29

1 Then at paragraph 6 and 7 you set out some more  
2 information about the period leading unto P113's  
3 admission to Muckamore Abbey Hospital, which you  
4 describe as being very stressful. And I won't read out  
5 all of that out, but I'll pick up at paragraph 8, where 15:58  
6 you say:

7  
8 "When we arrived at MAH, I remember seeing police  
9 officers and staff from MAH in the foyer of PICU. They  
10 told P113's mother and I why P113 had to be admitted to 15:58  
11 MAH and that it was in his best interests. The  
12 decision to admit P113 to MAH was out of our hands, so  
13 I trusted the professionals. Everyone conducted  
14 themselves in a pleasant manner and I felt reassured  
15 that they could help P113. I was told that P113 was 15:58  
16 admitted to the PICU ward for assessment. I thought  
17 that P113 would stay in MAH for a short period and did  
18 not imagine that he would be there almost six and a  
19 half years later.

20 15:58  
21 I was unable to visit P113 for approximately one week  
22 after his admission as he was under assessment. P113's  
23 mother telephoned MAH every day to find out how P113  
24 was and asked when we could see him.

25 15:59  
26 When we were permitted to see P113 in PICU, I  
27 remembered thinking the staff who cared for him seemed  
28 pleasant. They gave the impression that they were  
29 looking after P113 appropriately and he was doing well.

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28  
29

I remember there were times when I thought P113 was over-medicated, as he was lethargic, but I trusted that his care team were acting in his best interests. I am aware that PRN was administered to P113, but I do not know if this is why he seemed heavily medicated. 15:59

I am aware that H89 worked in PICU when P113 was a patient there. I did not know H89 before P113 was admitted to PICU, but was aware that P113's mother knew her from school. She was friendly and gave me no cause for concern. 15:59

P113 stayed in PICU for approximately three weeks and then moved to Cranfield 1. On the day that P113 moved to Cranfield 1, P113's mother and I were visiting, so we walked him to Cranfield 1. 15:59

I visit P113 on Friday and Sunday of each week with P113's mother. We take him out of MAH on a Friday and bring him around the shops for something to eat. There were times when we called on a Friday to collect P113 when he was not dressed or he was wearing old, worn clothes. P113's mother and I buy P113 new clothes regularly as it is important to us that he is well dressed and has clean, good quality and comfortable clothes to wear. Before they are given to staff in MAH, P113's mother put them in a bag with a label on it saying that they need to be sent to the laundry for 16:00

1 P113's name to be put on them. This helps ensure that  
2 when they are washed in the laundrette, they are easily  
3 identified as P113's clothes so they can be brought  
4 back to him.

5  
6 There have been times when we are looking for an item  
7 of clothing for P113 to wear and it cannot be found.  
8 For example, my mother bought P113 a new Adidas top  
9 that cost £45 and we noticed on a visit six months  
10 later that another resident was wearing it. Sometimes 16:00  
11 clothes disappear. When I ask staff where P113's  
12 clothes are, I am told that they are most likely in the  
13 laundry room.

14  
15 There have been several occasions when I have went to 16:01  
16 the laundry room with staff to try to find P113's  
17 clothes. The laundry room is a large industrial room  
18 with washing machines and driers. Patients' clothes  
19 are organised into a box with their name on it. When  
20 looking for P113's clothes, staff search through 16:01  
21 patient boxes and ask me to identify any clothes that  
22 belong to P113. I do not look through the boxes, but  
23 observe staff. There are times when P113's clothes are  
24 found in another patient's box and times when they  
25 cannot be found. When I ask why his clothes have been 16:01  
26 put into another patient's box, I am told that mixups  
27 happen.

28  
29 P113 sent his 21st birthday in MAH. We brought

1 presents, balloons and cake to P113. I found this day  
2 difficult, as celebrating his 21st in MAH was not what  
3 I had imagined. Along with P113's mother and P113's  
4 two brothers, we did our best celebrate the day for  
5 P113. 16:02

6  
7 There have been attempts to resettle P113 in the  
8 community."

9  
10 And you then describe the efforts to resettle P113 into 16:02  
11 a residential care home, which you've already heard  
12 P113's mum describe. And I won't read all of that  
13 aloud again, but I'll pick up then at paragraph 16.  
14 And you can see you say:

15 16:02  
16 "I think that P113's move to the residential unit was  
17 unsuccessful due to a lack of planning and staff  
18 training. The resettlement team expected P113 to  
19 transition without any issues. He needs time to settle  
20 in new environments and he needs appropriate support. 16:02  
21 The fact that MAH staff were told by the residential  
22 unit not to visit P113 any more would not have helped  
23 him. In addition, the layout of the bungalow was not  
24 suitable for P113's needs. P113's room was at the back  
25 right side of the bungalow his day room was at the back 16:02  
26 left side of the bungalow, which meant that he had to  
27 walk past the kitchen and bathroom to get there. P113  
28 needs direct access to his day room from his bedroom so  
29 that he does not become upset or frustrated if he does

1 not have a clear path to get there.

2

3 I became aware that allegations of abuse had been made  
4 against staff in MAH in late summer of 2017 after  
5 P113's mother spoke with Glynn, who is the father of a 16:03  
6 patient at MAH. We were visiting P113 in his bedroom  
7 on Cranfield 1 shortly after we found out about the  
8 allegations when a member of staff in MAH called H457  
9 came into his room. H457 was nice and friendly and  
10 usually spoke to me and P113's mother. P113's mother 16:03  
11 was with P113 and I turned to speak to H457. When I  
12 looked at her, she began to cry and said 'I'm sorry'.  
13 I asked her what she said and she said 'I'm sorry'  
14 again and left the room. I do not know why she said  
15 this and asked P113's mother what she thought she meant 16:04  
16 by this. I wondered if H457 had seen something that  
17 she did not report or if she was involved in the abuse.  
18 I still do not know the reason she said this.

19

20 I was not aware that P113 had been subject to abuse 16:04  
21 until May 2018. P113's mother and I had taken P113 to  
22 the Tower Centre in Ballymena, when P113's mother told  
23 me that she received a voicemail from someone at MAH  
24 and she wondered if this meant that P113 was involved.  
25 When P113's mother answered the second phone call, I 16:04  
26 was shocked beyond belief that P113 had suffered abuse  
27 by those who were caring for him.

28

29 P113's mother could not tell me too much at this time,

1 as we were with P113 and did not want to upset him. As  
2 P113's mother has set out, P113 picks up on behaviours  
3 and if he had picked up that something was wrong, this  
4 would have upset him. P113's mother and I took P113  
5 back to MAH and we discussed what she was told when we  
6 got home. 16:04

7  
8 I feel the way that P113's mother was told about the  
9 incidents over the phone was not professional. I was  
10 annoyed that they put the burden of having to tell me 16:05  
11 what happened to P113 on P113's mother and they should  
12 have told us in person together. I believed that P113  
13 was in a safe and secure surrounding and that he was  
14 being looked after by professional people. I was angry  
15 to find out that he was not. 16:05

16  
17 Following this phone call, P113's mother and I met with  
18 H411 on 8th June 2018. P113's mother has set out the  
19 experience in full and I agree with her description of  
20 the meeting. My intention for the meeting was to find 16:05  
21 out what happened and how P113 was involved. I asked  
22 H411 if the incidents of abuse were known because of a  
23 whistleblower within the Belfast Trust, as we had heard  
24 a member of staff had spoken out. She said there was  
25 no whistleblower. 16:05

26  
27 After P113's mum and I found out about the abuse, the  
28 PSNI met with us at our home. They told us they were  
29 reviewing CCTV footage and would report any incidents

1 involving P113 to us. They were sympathetic and tried  
2 to assure us that justice would be served. We  
3 discussed the best way for incidents involving P113 to  
4 be reported to us. The PSNI agreed to contact P113's  
5 mother to report any new incidents.

16:06

6  
7 The PSNI introduced P113's mother and I to Family  
8 Liaison Social Worker 2, a family liaison officer, on  
9 the 19th February 2020. The family liaison officer  
10 asked if P113's mother and I would like to attend  
11 counselling services with a psychologist who worked in  
12 Belfast. We decided that this would help and we met  
13 with the psychologist over Zoom between July 2020 and  
14 October 2020. I talked about how I felt when I heard  
15 P113 was treated in MAH. P113's mother and I talked  
16 openly and found that these sessions really helped us  
17 process our feelings.

16:06

16:06

18  
19 At paragraph 57 of P113's mother's statement she refers  
20 to a text message from H498, who is part of the  
21 safeguarding social work staff in the Belfast Trust  
22 that records I picked P113 up from MAH at 11:30  
23 following an incident on 16th December 2022 where P113  
24 banged his head against doors and chased staff.  
25 Restraint was used PRN was administered. I do not  
26 recall this day and do not recall ever collecting P113  
27 from MAH at 11:30 p.m. This may be a typographical  
28 error and should read 11:30 a.m. I do not recall any  
29 member of staff telling me about the incident and that

16:07

1 PRN was administered when I collected P113 from MAH."

2  
3 Then moving over to paragraph 23, you say:

4  
5 "I am pleased that P113 is due to leave MAH soon. The 16:07  
6 resettlement team within the Northern Trust have found  
7 suitable accommodation in a residential home for P113  
8 to move to. The residential home is located close to  
9 our home."

10  
11 And you name someone who showed P113's mother -- you 16:07  
12 say that person "showed P113's mother and I the  
13 property, which seems to meet P113's needs.

14  
15 Staff in the residential home have met with P113 and 16:08  
16 they are working with MAH to familiarise him with his  
17 new accommodation and ensure an appropriate care  
18 package is in place before he leaves MAH.

19  
20 P113's mother and I meet with the multidisciplinary 16:08  
21 team every fortnight to discuss P113's resettlement  
22 plan. I find it unbelievable that so many incidents  
23 happened right under my nose. The staff involved  
24 covered up what was happening and lied to me and P113's  
25 mother when we asked about P113. It makes me angry to 16:08  
26 think about how my son has suffered. I feel helpless,  
27 as I did not know that P113 was suffering, so I could  
28 do nothing about it. P113 cannot tell me what  
29 happened, so I may never know full details. I feel let

1 down by MAH, as I trusted that my son would be looked  
2 after in a safe and secure environment. I hope that  
3 when P113 moves to the residential home that he will be  
4 cared for and looked after as expected by care  
5 professionals and that he is happy." 16:09

6  
7 And that is the end of your statement, which you then  
8 sign and it's dated 6th September. So, having heard me  
9 read that aloud, are you happy with the contents of  
10 your statement, first of all? 16:09

11 A. I am, yeah.

12 66 Q. And do you wish to adopt it as part of your evidence to  
13 the Inquiry?

14 A. Yes.

15 67 Q. Okay. Again, I'm not going to ask you to go through 16:09  
16 every thing that you have already said in your  
17 statement. You have heard P113's mum give evidence; do  
18 you agree with the experiences that she has outlined to  
19 the Inquiry?

20 A. Yeah. Yes. 16:09

21 68 Q. And did you have similar experiences to P113's mum?

22 A. Yeah.

23 69 Q. And similar feelings about the treatment of P113 at  
24 Muckamore?

25 A. Totally. 16:09

26 70 Q. One of the things that I wanted to ask you particularly  
27 about was P113's admission to Muckamore. Because you  
28 described it as being out of your hands. Was there a  
29 frustration there at that time?

1 A. When P113 was admitted to Muckamore?  
2 71 Q. Admitted, yeah.  
3 A. Was there a frustration?  
4 72 Q. A frustration at it being out of your hands.  
5 A. Yeah, I suppose. But, here, when you think about it, 16:10  
6 it was something that had to happen. You know, P113  
7 was just escalating out of control and...  
8 73 Q. And he was detained formally under the Mental Health  
9 Order.  
10 A. Yeah. 16:10  
11 74 Q. You describe what happened whenever you arrived at  
12 Muckamore with P113 and the police officers. At that  
13 time did anyone explain to you what would happen to  
14 P113 whenever he was in Muckamore?  
15 A. I can't remember. 16:10  
16 75 Q. And can you remember if at that time, or at any time,  
17 you were ever told what rights you had as a parent of  
18 someone who was detained under the Mental Health Order?  
19 A. No, I don't remember.  
20 76 Q. Do you ever remember receiving a leaflet or a letter of 16:11  
21 that kind saying, telling you about your rights or what  
22 you could do given that P113 was detained?  
23 A. I can't remember back.  
24 77 Q. Nothing?  
25 A. No, I don't know. I would need to... 16:11  
26 78 Q. No, that's okay. That's okay. I, as I say, am not  
27 going to ask you to repeat everything that P113's mum  
28 has said, so there is nothing more specific arising  
29 from your statement that I wanted to ask you about. As

1           you know, there was a paragraph that I haven't read,  
2           which we will come on to, but excepting that paragraph,  
3           so forgetting about those incidents, is there anything  
4           else that you would like the Inquiry to know about your  
5           experience at Muckamore? 16:11

6           A.    No.

7           MS. KILEY:  Okay.  Well, I have no other questions for  
8           you.  The Panel might.

9           CHAIRPERSON:  No, the Panel don't have any questions  
10          either, so I think your wife has actually covered it. 16:12  
11          But thank you very much indeed for coming to assist.  
12          So we've got to move on into restricted...

13          MS. KILEY:  Into restricted session.  And if we do  
14          that, both witnesses remain sworn, so all I intend to  
15          do is to read the relevant portions of each statement 16:12  
16          aloud and have it adopted.

17          CHAIRPERSON:  sure.  Okay.  so could we deal with the  
18          father first perhaps, since he's sitting there.

19  
20          THE INQUIRY THEN WENT INTO RESTRICTED SESSION 16:12

21  
22  
23  
24  
25  
26  
27  
28  
29
